Blend of red and green leaf lettuces, great in containers.

- Full sun, but can bolt or wilt in strong heat
- Direct sow in cool season
- Plant 1/8" deep, 4-16" apart
- 30-60 days to maturity

Seed source: Eden Brothers

PEA: Sugar Snap
Pisum sativum

Sweet, crisp pods. Needs trellising. Cool weather crop.

- Full/partial sun
- Plant in cool season, direct sow
- Plant 1/2-1" deep, 1-1/2-2" apart, rows 18-36"
- 58 days to maturity

Seed source: Johnny's

PEPPER: Early Jalapeno Chile
Capsicum annuum

Bold flavor, medium heat, 3" long. Enjoy green or ripen to red for sweeter flavor.

- Full sun
- Start indoors and transplant
- Plant seedlings 18-24" apart
- Plant height 18-36", 12-24" wide
- 63 days to maturity after transplanting

Seed source: Botanical Interests

PEPPER: Lunchbox Mix

Red, yellow, and orange lunchbox snack peppers, flavorful and sweet.

- Full sun
- Start indoors and transplant
- Plant seedlings 12-18" apart, rows 24-36"
- Plant height 18-24"
- 55-80 days to maturity after transplanting

Seed source: Botanical Interests

PEPPER: Shishito
Capsicum annuum

Thin-walled, no heat, delicious roasted. 3" long.

- Full sun
- Start indoors and transplant
- Plant seedlings 12-18" apart
- 60 days to maturity

Seed source: Johnny's

SPINACH: Equinox
Spinacia oleracea

Fast-growing, slower-bolting, harvest at baby leaf or full size.

- Full sun, can tolerate some shade
- Direct sow
- Plant 1/2" deep, 10 seeds per foot, rows 12-18" apart
- 29 days to maturity

Seed source: Johnny's

SQUASH: Waltham Butternut
Cucurbita moschata

Butternut winter squash, yields 4-5 fruits per plant.

- Full sun
- Direct sow
- Plant 1/2-1" deep, 2-3 seeds per mound, rows 6-8 feet apart
- Vines are 8 feet long
- 100 days to maturity

Seed source: Botanical Interests

SQUASH: Scallop Blend Summer
Cucurbita pepo

Yellow, white, and green blend of "patty pan" summer squashes. Good in containers.

- Full sun
- Direct sow
- Plant 1/2-1" deep, 2-3 seeds per mound, rows 3-4 feet apart
- Plant height 2 feet, 3-4 feet wide
- 45-60 days to maturity

Seed source: Botanical Interests

SQUASH: Zucchini, Black Beauty
Cucurbita pepo

Dark-green skin and delicate white flesh; popular zucchini squash dating to the 1920s.

- Full sun
- Direct sow
- Plant 1/2-1" deep, plants 18-24" apart
- 60 days to maturity

Seed source: Eden Brothers

SQUASH: Zucchini, Golden
Cucurbita pepo

Compact bush variety, medium-size zucchini. Great for small spaces.

- Full sun
- Direct sow
- Plant 1/2-1" deep, rows 18-24" apart
- 60-90 days to maturity

Seed source: Eden Brothers

TATSOI
Brassica rapa var. narinosa

Round, cupped green leaves with white, crunchy, juicy stems.

- Full to partial sun
- Direct sow
- Plant 1/4" deep, 3-5 seeds per ", rows 2" apart
- 25-45 days to maturity depending on desired leaf size

Seed source: Johnny's

SWISS CHARD: Heart of Gold
Beta vulgaris

Green leaves, golden stems, vigorous plants and excellent yield.

- Full sun to partial shade in hot weather
- Direct sow
- Plant 1/2" deep, 6 seeds per foot, rows 12-18" apart
- 30-60 days to maturity depending on desired leaf size

Seed source: Johnny's

TOMATILLO: De Milpa
Physalis philadelphica

Green and purple heirloom tomatillos. Store for several weeks--delicious in salsa.

- Full sun
- Sow indoors then transplant
- Plant at least two seedlings, for successful pollination and fruit set
- 70 days to maturity

Seed source: Johnny's

TOMATO: Roma
L*ycopersicum esculentum*

A classic and often used as a “sauce” tomato. Mild sweetness. Determinate plant.

- Full sun
- Sow indoors 1/4-1/2″ deep, then transplant
- Space plants 18-36″
- 60-90 days to maturity

Seed source: Eden Brothers

TOMATO: Sunrise Bumblebee
Solanum lycopersicum

A yellow and red cherry tomato, very sweet with some tang. Indeterminate.

- Full sun
- Sow indoors 1/4″ deep, then transplant
- Space rows 24-36″ apart
- 70 days to maturity

Seed source: Johnny's
