1.0 INTRODUCTION

1.1 Purpose and Scope of Work

This report presents the results of a Phase I Environmental Site Assessment (ESA) for the property located at 402 South Delaware Street and 524 East 4th Avenue in San Mateo, California (the site or subject property). The site location is shown on Plate 1, and the subject property and vicinity are shown on Plate 2. PES Environmental, Inc., an NV5 Company (PES) performed the Phase I ESA on behalf of Windy Hill Property Ventures (WHPV) to compile and evaluate available information to assess for Recognized Environmental Conditions (RECs) associated with the site. PES understands that WHPV is evaluating acquisition of the subject property.

The ESA was performed pursuant to our proposal (Reference No. 1409.019.01.P01) dated August 19, 2021 and in general accordance with ASTM International guidelines for Phase I Environmental Site Assessments (ASTM E1527-13). These guidelines comply with the U.S. Environmental Protection Agency's All Appropriate Inquiries (AAI) rule adopted in November 2013. The following tasks were conducted during this ESA:

- Federal, State and local agency databases were reviewed to identify nearby sites that have reported the use, storage, or release of hazardous materials;
- Regulatory agency records regarding the site and adjacent properties were reviewed;
- Historical aerial photographs, Sanborn® Fire Insurance maps, and historical topographic maps of the site and surrounding area were evaluated, as available, to assess prior land uses;
- Historical documents concerning investigations performed at the subject property were reviewed;
- Individuals with knowledge of the site were interviewed;
- An inspection of the site and a reconnaissance of surrounding properties were performed to assess the potential for contamination of the site from onsite or offsite sources. The site inspection was conducted by an environmental professional with qualifying experience; and
- This report was prepared presenting the results of the Phase I ESA assessment.

A Recognized Environmental Condition, or REC, is defined in the ASTM International guidelines (ASTM E1527-13) as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. A controlled REC (CREC)

is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity/use limitations, institutional controls, or engineering controls). An historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

De minimis conditions are defined by ASTM as conditions that generally do not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. A *de minimis* condition is not a REC and not a CREC.

1.2 Special Terms and Conditions

The ESA activities were conducted in general accordance with ASTM E1527-13. There are no other special terms or conditions for this report.

1.3 Limitations and Exceptions

This Phase I ESA was performed in accordance with practices and procedures generally accepted in the consulting environmental engineering profession at the time they were performed. The findings, opinions, conclusions, and recommendations expressed herein are applicable as of the date the services were provided. Our professional judgment to assess the potential for contamination is based on limited data; no warranty is given or implied.

The Phase I ESA was prepared at the request of WHPV and may be relied on only by WHPV. No other party may rely on this report without the express written permission of WHPV and PES.

PES was not provided information regarding the value or purchase price of the subject property, nor prices of comparable properties in the site vicinity. In accordance with ASTM E1527-13, an evaluation of the purchase price relative to those of comparable properties should be conducted by the user of this Phase I ESA, as applicable.

2.0 USER PROVIDED INFORMATION

2.1 Title Records

A Preliminary Title Report was provided to PES by WHPV. PES's review of the report did not indicate any liens, easements, or previous owners of environmental concern. A copy of the report is included in Appendix A.

2.2 Environmental Liens or Activity and Use Limitations

Information regarding environmental liens or activity or use limitations was not provided to PES for this ESA, and PES is not aware of any such liens or use limitations on the subject property.

2.3 Specialized Knowledge or Experience

PES does not possess any specialized knowledge or experience regarding the subject property. Also, as noted below, WHPV has reported to PES that it has no specialized environmental knowledge regarding the subject property.

2.4 User Questionnaire

As part of this Phase I ESA, a copy of a User Questionnaire, as recommended in ASTM E 1527-13, was submitted to Mr. Austin O'Such of WHPV. This questionnaire, completed by the party who will rely on the ESA, facilitates the transfer of known site information to the environmental professional and promotes qualification of the relying party for one of the *Landowner Liability Protections (LLPs)*[1] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"). A copy of the User Questionnaire is provided in Appendix A.

2.5 Commonly Known or Reasonably Ascertainable Information

Any commonly known or reasonably ascertainable information provided to PES during the preparation of this Phase I ESA is presented within this report.

2.6 Valuation Reduction for Environmental Issues

PES was not provided with information regarding valuation of the subject property for this ESA. WHPV reported that the purchase price reasonably reflects fair market value.

---

[1] *Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund Liability in US EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.*

2.7 Owner, Property Manager, and Occupant Information

WHPV provided PES with current owner information. The property is owned by Linda B. Spady, Trustee of the Linda B. Spady Trust. The property is occupied by a Union 76 gas station with a retail convenience store and TNT Auto Repair.

2.8 Reason for Performing Phase I

The Phase I ESA was completed as part of evaluating a potential acquisition of the property.

3.0 SITE DESCRIPTION

3.1 Location and Description

The subject property consists of one legal parcel comprising approximately 0.45 acres bounded to the northeast by South Delaware Street, to the southeast and southwest by commercial buildings, and to the northwest by East 4th Avenue. The site has the addresses of 402 South Delaware Street and 524 East 4th Avenue and is described by San Mateo County Assessor's Parcel Number (APN) 034-186-110.

3.2 Site and Vicinity Characteristics

The site is developed with a gasoline service station currently operated by Union 76 and TNT Auto Repair. The site is accessed by two driveways from East 4th Avenue and two driveways from South Delaware Street.

The subject property is in an area developed with residential and commercial/retail buildings within the downtown area of San Mateo, San Mateo County, California. The subject property and adjacent areas are shown on Plate 2.

3.3 Physical Setting

According to the United States Geological Survey (USGS) *San Mateo, California* Quadrangle 7.5-minute series topographic map dated 2012, the site is situated at an elevation of approximately 22 feet above mean sea level. The site is flat, but the area in the general vicinity of the site slopes to the east-northeast. The nearest surface water body is San Mateo Creek, which is located approximately ¼-mile north of the site. San Francisco Bay is present approximately 1-mile east-northeast of the site.

3.4 Local Geology and Hydrogeology

Based on the results of investigations performed on the subject property (Antea, 2017), the site is underlain by silty/clayey sands and silty/clayey gravels interbedded with sandy silts and clays extending to the maximum depth explored of approximately 40 feet below ground surface (bgs). The subsurface materials are consistent with a typical alluvial fan.

Prior investigations identified the presence of two water-bearing zones beneath the site. However, subsequent monitoring of the 20 onsite wells indicated a single water-bearing zone beneath the site. During the last groundwater monitoring event performed at the site in August 2017, the depth to groundwater ranged from approximately 15 to 18 feet bgs. Groundwater flows predominately to the east.

3.5 Wetlands

As shown in the database report from EDR (Appendix B), there are no identified wetlands within the site vicinity.

3.6 Descriptions of Existing On-Site Structures and Improvements

3.6.1 Structures and Current Use

The subject property is currently developed with a service building occupied by a small retail store operated by Union 76 and two service bays used by TNT Auto Repair. The Union 76 service station also consists of five dispenser islands, two 12,000-gallon gasoline underground storage tanks (USTs), and one approximately 550-gallon waste oil UST.

3.6.2 Other Improvements

Electricity and natural gas are supplied by Pacific Gas & Electric (PG&E). Water service is provided by California Water Service (Cal Water), and sewer service is provided by the San Mateo Department of Public Works (SMDPW).

3.7 Current Uses of Adjoining Properties

A reconnaissance of the surrounding area was performed to assess whether neighboring sites represent a potential environmental condition that could affect the subject site. The current uses of the adjoining properties, as observed during the reconnaissance, are summarized below.

Properties to the North

The subject property is bounded to the north by the intersection of South Delaware Street and East 4th Avenue and beyond by a Gas & Shop service station.

Properties to the Northeast

The subject property is bounded to the northeast by South Delaware Street and beyond by a Jiffy Lube oil change specialty shop and a two-story apartment building and associated parking lot.

Properties to the East

The subject property is bounded to the east by a building occupied by Safari Kid preschool and daycare and beyond by the intersection of East 5th Avenue and South Delaware Street.

Properties to the South

The subject property is bounded to the south by an outdoor playground and asphalt parking lot associated with Safari Kid preschool, a residence, and a residence and small rectangular building occupied by the San Mateo Japanese-American Community Center. Farther south is the intersection of South Claremont Street and East 5th Avenue.

Properties to the West

The subject property is bounded to the west by a Taco Bell restaurant and associated asphalt parking lot and beyond by the intersection of South Claremont Street and East 4th Avenue.

Properties to the Northwest

The subject property is bounded to the northwest by East 4th Avenue and beyond by AMA Tires (an automotive wheel and shop) and a retail building occupied by Western Union, Boost mobile, Glamorous Looks Salon, La Pinata market, and Las Cazuelas Taqueria.

3.8 Past Uses of Property and Adjoining Properties

Historical site use information was obtained through a review of aerial photographs, historical topographic maps, historical Sanborn® Fire Insurance Maps, city directories, and regulatory agency file reviews.

3.8.1 Historical Sources

Site use information was obtained through a review of the following list of historical sources. The results of review of these sources are summarized below.

- **Aerial Photographs:** Aerial photographs obtained from the EDR database report were reviewed for the following years: 1943, 1946, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2012, and 2016. PES's summary and copies of the photographs are presented in Appendix C;

- **Sanborn® Fire Insurance Maps:** Sanborn® Fire Insurance Maps obtained from the EDR database report were reviewed for the following years: 1888, 1891, 1897, 1901, 1908, 1920, 1950, 1953, 1956, 1961, and 1969. PES's summary and copies of the Sanborn® Fire Insurance Maps are provided in Appendix D;

- **Topographic Maps:** Various topographic maps of the subject property vicinity were compiled by EDR. The following maps were included in the compilation: USGS *San Mateo, CA* Quadrangle 15-minute series topographic maps produced in 1896, 1899, 1915, and 1939; and USGS *San Mateo, CA* Quadrangle 7.5-minute series topographic maps produced in 1947, 1949, 1956, 1968, 1973, 1980, 1993, 1997, and 2012. PES's summary and copies of the topographic maps are presented in Appendix E;

- **City Directories:** A search for available city directories was performed by EDR. Directories from 1956 to 2017 were searched in approximately 5-year intervals. PES's summary and copies of the city directory listings are presented in Appendix F;

- **Previous Environmental Repots:** Historical information from a previous environmental report is included in the summary below. The report is discussed in Section 4.0;

- **San Mateo Building Department (SMBD):** PES reviewed SMBD records provided by SMBD. Pertinent information is included in the summary below; and

- **Regulatory Agencies Review:** PES reviewed historical files concerning the site obtained from San Mateo County Environmental Health (SMCEH). SMCEH records are discussed further in Section 5.2.1.

3.8.2 Historical Review Summary

The following provides historical use information for the subject property and vicinity based on available historical resources listed in the previous sections.

Subject Property

The earliest historical source for the subject property (an 1888 Sanborn Map) shows the site occupied by residences and associated outbuildings. The site remained in residential use until at least the early 1960s. The currently-existing building was constructed in 1966 for use as a gas station (American Oil). The site has remained in use as a gas station since that time. Operators of the gas station have included American Oil, Chevron, ConocoPhillips and Union 76. A portion of the building has been used as an auto repair facility, likely since construction of the building. Previous environmental investigations performed at the site [associated with leaking underground storage tanks (USTs)] are discussed further in Section 4.0.

Based on the age of historical residences and structures at the site, it is likely that lead-containing paint was used and asbestos-containing materials were present. Lead may have been introduced into the soil via flaking and/or prior demolition activities. Asbestos may also be present in soil as a result of prior demolition activities.

Subject Property Vicinity

The earliest historical source for the subject property (an 1888 Sanborn Map) shows the site vicinity developed primarily with residences with several vacant lots. Commercial development began in the early 1900s. Businesses originally in the site vicinity included a PG&E substation, lumber/planning mill, and lumber yard. Beginning in the 1950s, several gas stations and dry cleaners were present in the site vicinity. A Union Oil gas station operated immediately west (current Taco Bell location) of the subject property until apparently replaced by the gas station on the subject property. Gas stations were present farther northwest, north, and northeast of the site. Dry cleaners were present further to the southwest (Wardrobe Cleaners) and to the northwest.

3.8.3 Interviews

PES interviewed Mr. Dung Tran, owner of the Union 76 gasoline service station, on September 1, 2021. He stated that he leases the two service bays and there are two 12,000-gallon gasoline USTs and an approximately 550-gallon waste oil UST that is actively used by the auto repair business.

4.0 PREVIOUS ENVIRONMENTAL SITE INVESTIGATIONS

PES reviewed reports of investigation performed on the subject property beginning in 1992. The reports were provided by SMCEH. PES's review of the reports is summarized below. Copies of the reports are included in Appendix G.

4.1 UST and Oil/Water Separator Removal

Due to the failure of a tank integrity test in June 1992, two 12,000-gallon gasoline USTs and associated piping and one 550-gallon waste oil UST were removed from the site by Kaprealian Engineering, Inc. (KEI). A crack was observed in one of the gasoline USTs reportedly caused by subsurface drilling, and two holes were reported in the waste oil UST. Approximately 800 cubic yards (cy) of soil was overexcavated from the UST cavity and disposed offsite, and approximately 5,800 gallons of groundwater was pumped from the excavation. Soil samples collected during the removal activities contained petroleum hydrocarbon concentrations as high as 5,000 milligrams per kilogram (mg/kg) total petroleum hydrocarbons quantified as gasoline (TPHg) and 47 mg/kg benzene (KEI, 1992).

The USTs were replaced with the currently-existing two 12,000-gallon gasoline USTs and one approximately 550-gallon waste oil UST.

In January 1996, a 150-gallon oil/water separator was removed from the site, but not replaced (GSI, 1996). No significant contaminant concentrations were detected in a soil sample collected from approximately 4.5 bgs beneath the separator.

4.2 1994 – 2017 Subsurface Investigations

Subsurface investigations began in 1994. During the period from 1996 to 2012, 20 soil boring were advanced to depths up to 32 feet bgs. Between 1994 and 2015, 26 groundwater monitoring wells were installed in the two water-bearing zones identified at the site (subsequently identified as a single water-bearing zone). The wells were monitored quarterly to semi-annually until the final monitoring event in August 2017. In 2006, three vapor monitoring points were installed on the subject property, and in 2013, four vapor monitoring points were installed offsite.

Nature and Extent of Contamination

Groundwater

The most recent groundwater sampling event (2017) indicated the maximum estimated extent of gasoline range organics (GRO) and benzene were approximately 350 feet and 245 feet, respectively, east of the former UST excavation (Antea, 2018). In the August 2017 groundwater monitoring event, GRO, benzene, and naphthalene were detected as high as 42,000 micrograms per liter (μg/L), 620 μg/L, and 730 μg/L, respectively. The detections were in the monitoring well located closest to the former UST excavation (well MW-6). Methyl tertiary butyl ether (MTBE) was only detected in well MW-18 at 99 μg/L, located near the east site boundary.

From 2007 through 2014, groundwater samples were additionally analyzed for volatile organic compounds (VOCs), including tetrachloroethene (PCE) and trichloroethene (TCE). During this period, the highest PCE and TCE concentrations detected onsite were in well MW-7, located near the southern property boundary, and well MW-13B, a deep well located near the former UST excavation. In well MW-7, PCE and TCE were detected as high as 172 and 12.5 μg/L, respectively, and in well MW-13B, PCE and TCE were detected as high as 460 and 42.6 μg/L, respectively, both in March 2010.

Soil

Soil samples were collected at the site between 1994 and 2013. In samples collected in the interval between 0 and 10 feet bgs, benzene was detected in only two samples at a concentration of 0.012 mg/kg in both samples. This concentration is below both 2012 California State Water Resources Control Board (SWRCB) Low Threat Underground Storage

Tank Closure Policy, Resolution No. 2012-0016 (LTCP) maximum allowable concentrations for the commercial/industrial and utility workers scenarios and the current 2019 Regional Water Quality Control Board (RWQCB) Tier 1 Environmental Screening Levels (ESLs; RWQCB, 2019). Petroleum hydrocarbons and associated contaminants were detected in deeper samples collected from the capillary fringe or saturated zones, and were not considered a vapor intrusion concern.

Soil Vapor

In December 2006, Secor International Inc. (Secor) installed three soil vapor probes south and north of the former UST excavation, and a subslab vapor probe in the southeast corner of the station building (Secor, 2007). Samples were collected from the vapor probes in January and February 2007 and from the subslab vapor probe in January 2007 when analytes included total purgeable petroleum hydrocarbons (TPPH), benzene, toluene, ethylbenzene, xylenes (BTEX), MTBE, and fuel oxygenates. No significant concentrations were detected in the soil vapor probes or subslab probe. The soil vapor probes were again sampled in August 2013 and January 2014 at the request of SMCEH, and analytes additionally included naphthalene and PCE. PCE was detected in one vapor probe at 19 micrograms per cubic meter ($\mu g/m^3$), which is slightly above the 2019 RWQCB Tier 1 ESL of 15 $\mu g/m^3$.

In August 2013, Antea installed a total of four subslab vapor points at offsite locations: (1) two at 521 East 5th Avenue, a vacant office building (currently Safari Kids) located adjoining the southeastern site boundary; and (2) two at 603 East 5th Avenue, an apartment building located east-northeast (downgradient) of the site (Antea, 2014a). Soil vapor samples were collected in August 2013 and February 2014 and analyzed for GRO, BTEX, MTBE, fuel oxygenates, naphthalene, and PCE. PCE was detected in both sampling points in the vacant office building at concentrations as high as 2,100 and 2,200 $\mu g/m^3$. Naphthalene was not detected above the Tier 1 ESL; however, the detection limit was above the Tier 1 ESL in several samples.

As discussed in Section 4.4 below, SMCEH has acknowledged that the subject property is not the source of the PCE detected in groundwater or soil gas at the subject property and in the site vicinity.

4.3 2014 PCE Source Evaluation

In 2006, a review of chromatographs of groundwater analyses for GRO resulted in the identification of PCE and associated degradation products. Subsequent groundwater monitoring which included analysis for VOCs identified PCE and associated degradation products in groundwater monitoring wells on the subject property and offsite. Because a low level of PCE was detected in a soil sample collected during the 1992 waste oil UST removal, additional soil, groundwater, and soil vapor investigations were performed to evaluate the source of the PCE (Stantec, 2008). In general, the only soil samples with detectable concentrations of PCE and associated degradation products were collected from the saturated

zone. Groundwater samples collected from wells upgradient (southwest and southeast) of the former UST excavation were found to contain PCE and associated degradation products, but no petroleum hydrocarbon contaminants. PCE was detected in one onsite vapor probe at 19 $\mu g/m^3$, but was detected in offsite subslab probes (located downgradient) at concentrations as high as 2,200 $\mu g/m^3$.

As discussed above in Section 4.2, groundwater monitoring included VOC analyses from 2007 to 2014. During this period, the highest concentrations detected onsite were in Well MW-7, located near the southern property boundary, and Well MW-13B, a deep well located near the former UST excavation.

Consequently, Antea performed a source evaluation to identify potential sources of the PCE which had been detected in soil, groundwater, and soil vapor during the site investigations (Antea, 2014b).

Antea identified several potential upgradient sources of the PCE contamination based on web-based searches and review of Sanborn maps and regulatory records. Antea identified the following potential sources:

- Wardrobe Cleaners, 333 and 335 East 4th Avenue – 560 feet west-southwest of the site;
- Family Cleaners, 412 East 3rd Avenue – 550 feet west-northwest of the site;
- R NU IT, 200 East 2nd Avenue – 1,300 feet west of the site;
- San Mateo Cleaners, 507 South B Street – 850 feet south-southwest of the site; and
- Blue Ribbon Cleaners, 306 East 5th Street – 800 feet south-southwest of the site.

Antea believed that Wardrobe Cleaners was the most likely source of PCE contamination identified at the subject property, and noted that a sewer line which traveled in front of the cleaners made a 90 degree turn to the northeast, traveling up East 5th Avenue.

In a letter dated October 29, 2014, SMCEH noted that it was likely that the PCE contamination originated from Wardrobe Cleaners, and SMCEH would not require the subject property to perform additional investigation of the PCE release (SMCEH, 2014).

Investigations performed at Wardrobe Cleaners and Family Cleaners are discussed in Section 5.2.2. PES did not identify any regulatory records concerning investigations performed at the other dry cleaners identified by Antea.

4.4 2017 – 2019 Site Closure Activities

In August 2017, Antea submitted a closure request for the subject property to SMCEH (Antea, 2017). Antea reported that the site met the criteria for the LTCP, specifically:

- The site vicinity is serviced by a public water supply, and the groundwater beneath the site could not be considered to have beneficial use due to the presence of PCE in groundwater from an upgradient source;
- The unauthorized release consisted only of petroleum hydrocarbons;
- The unauthorized release has been stopped;
- Free product was removed from the UST excavation, and no free product has been detected in any borings or monitoring wells associated with the site;
- The nature and extent of contamination has been described;
- Approximately 900 cy of soil was removed from the site and approximately 5,800 gallons of groundwater and product were pumped from the UST excavation;
- Soil and groundwater was analyzed for MTBE;
- A nuisance does not exist at the site;
- Petroleum hydrocarbon concentrations have shown a decreasing trend, and the lateral extent of GRO and benzene is limited to approximately 350 feet and 245 feet, respectively. Additionally, benzene and MTBE concentrations are below LTCP thresholds;
- Because the site is a petroleum fueling facility, petroleum vapor intrusion to indoor air concerns do not apply; and
- A statistical analysis of subsurface soil sample data indicates it is unlikely that benzene, ethylbenzene, or naphthalene would be encountered above LTCP threshold criteria.

In June 2019, Antea destroyed 13 monitoring wells by overdrilling, six wells by pressure-grouting, three vapor probes by air-knifing, and three subslab vapor monitoring points by probe removal (Antea, 2017). However, based on well construction details, the volume of grout added to well MW-4 was 41.6 percent less than the calculated grout volume. This was above the acceptable grout deviation limit and would typically require over-drilling destruction. Because an active sewer lateral was identified immediately adjacent to the well, over-drilling was not possible. Antea believed the well had limited potential as a preferential pathway because no obstructions were encountered in the well and because of the pressure grouting that was accomplished, and recommended that the well be considered destroyed. The two subslab vapor points installed in a commercial building at 521 East 5th Avenue were subsequently

covered with a self-leveling floor patch, vapor barrier, and glued vinyl planks during remodeling activities. Antea recommended that these probes be considered destroyed because they did not provide a preferential pathway as the building had been sealed, preventing subsurface vapor intrusion. In a letter dated November 4, 2019, SMCEH concurred with not over-drilling well MW-4 and they would not require removal of the probes because the subject property was determined to not be responsible for the PCE detected in those probes (SMCEH, 2019a).

SMCEH issued case closure for the site in a letter dated November 4, 2019 (SMCEH, 2019b). In a case closure summary included with the closure letter (SMCEH, 2018), SMCEH noted that hydrocarbon-affected soil and groundwater remain east and southeast of the fuel USTs and beneath South Delaware Street. In a letter to the City of San Mateo Community Development Department, SMCEH reported that the hydrocarbon-affected soil and groundwater remaining in place did not pose a significant threat to public health or the environment under existing land use. However, SMCEH is to be notified of any change in land use or planned removal of soil or groundwater from the area so the SMCEH could evaluate whether additional actions would be necessary to protect public health and the environment (SMCEH, 2019c).

5.0 ENVIRONMENTAL AGENCY DATABASES AND RECORDS REVIEW

5.1 Environmental Liens

Based on a review of an environmental database search conducted by EDR, there are no Federal Superfund (National Priority List [NPL]) liens or State environmental deed restrictions associated with the subject property. No information indicating the presence of environmental liens on the subject property was provided by WHPV.

5.2 Standard Environmental Record Sources

The discussion presented in this section is based on available information provided by environmental agencies and databases. An EDR database report dated August 20, 2021, contains listings of sites that are located within a 1-mile radius which were selected in accordance with the ASTM E1527-13 standard. This information is obtained from computerized databases of Federal, State, and local environmental records. The database report, which includes descriptions of the listings, is provided in Appendix B.

The following regulatory agency databases were searched and reported in the EDR report:

- U.S. Environmental Protection Agency (U.S. EPA) – Comprehensive Environmental Response Compensation, and Liability Information System (CERCLIS);
- U.S. EPA – CERCLA NPL;
- U.S. EPA – CERCLA Proposed NPL;

- U.S. EPA – Superfund (CERCLA) Consent Decrees (CONSENT);
- U.S. EPA – CERCLA Records of Decision (ROD);
- U.S. EPA – CERCLA NPL Deletions;
- U.S. EPA – CERCLA No Further Remedial Action Planned Site (CERC-NFRAP);
- U.S. EPA – Facility Index System (FINDS);
- U.S. EPA – Emergency Response Notification System (ERNS);
- U.S. EPA – Hazardous Materials Information Reporting System (HMIRS);
- U.S. EPA – Material Licensing Tracking System (MLTS);
- U.S. EPA – Mines Master Tracking Index File (MINES);
- U.S. EPA – Federal Superfund Liens (NPL Liens);
- U.S. EPA – PCB Activity Database System (PADS);
- U.S. EPA – RCRA Administrative Action Tracking System (RAATS);
- U.S. EPA – Section 7 Tracking Systems (SSTS);
- U.S. EPA – Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA)/Toxic Substance Control Act (TSCA) Tracking System (FTTS);
- U.S. EPA – Resource Conservation and Recovery Information System (RCRAInfo), Treatment, Storage, or Disposal (TSD) facilities, and Small Quantity and Large Quantity Generators (SQG and LQG) of hazardous waste;
- U.S. EPA RCRA Corrective Action Report (CORRACTS);
- U.S. EPA - Toxic Chemical Release Inventory System (TRIS);
- California State Water Resources Control Board (SWRCB) – Leaking Underground Storage Tank Listing (LUST) sites including Indian Land;
- SWRCB –Above-ground Storage Tank (AST) sites;
- SWRCB – Registered underground storage tank (UST) sites;
- SWRCB – Solid Waste Facilities (SWF/LF);
- CalEPA - California Environmental Reporting System Regulated Site Portal (CERS);

- CalEPA – CERS Hazardous Waste Generator (CERS HAZ WASTE);
- CalEPA – CERS AST and UST sites (CERS TANKS);
- Department of Toxic Substances Control (DTSC) – Voluntary Cleanup Program (VCP); and
- Department of Toxic Substances Control (DTSC) – Hazardous Waste Tracking System (HWTS).

The following California Environmental Protection Agency (CalEPA) websites were also searched for environmental records related to the subject property:

- SWRCB's GeoTracker website located at http://geotracker.swrcb.ca.gov/; and
- DTSC's EnviroStor website located at http://www.envirostor.dtsc.ca.gov/public/default.asp.
- Additionally, PES requested records for the subject property from SMCEH. Regulatory records concerning previous investigations at the subject property are discussed in Section 4.0.

5.2.1 Subject Property Records

Database Listings

Unocal 76 station, **402 South Delaware Street**, is listed on the LUST, UST, RCRA NonGen, CERS, CERS Tanks, CERS Haz Waste, and San Mateo County Business Inventory (BI) databases. The LUST database lists the site as having received regulatory closure on November 4, 2019 (see Section 4.0). The RCRA NonGen database includes a 2019 listing indicating the business does not generate RCRA wastes. The UST, CERS Tanks, CERS Haz Waste, and San Mateo County BI database listings correspond to current use of the site as a Union 76 gas station. The CERS database lists violations noted during SMCEH inspections performed at the Union 76 station as summarized below:

- October 2018: Failure to comply with overfill prevention equipment requirements. Inspector noted that there was no secondary containment on vent, vapor recovery, or fill components, and no overfill device was installed with the waste oil UST. The facility returned to compliance on August 27, 2019;
- March 2019: Float and chain assemblies failed on first test. Following adjustment and re-test, assemblies passed. Minor leak observed which was repaired the following day. Failure to maintain adequate spill container and failure to perform applicable testing. The facility returned to compliance in August 2019;

- July 2019: Incomplete UST permit information. The facility returned to compliance in August 2019;
- December 2019: Failure to maintain secondary containment; leaks were detected in product line and fittings. The facility returned to compliance in April 2020;
- January 2020: Administrative review of UST Secondary Containment Testing Report noted failures for which technician recommended repairs. In February, facility reported that they were preparing permit application for the repairs;
- February 2020: One dispenser float and chain did not function during first test. Adjustments were made, re-test was performed, and passed;
- April 2020: No failures observed during testing; and
- February 2021: Dispenser float and chain did not function during first test. Adjustments were made, re-test was performed, and passed. Inspector noted this was a repeat violation from 2019 and 2020 and suggested using a stand-alone sensor. Failure to property label hazardous waste accumulation containers.

TNT Auto Repair, 402 Delaware Street, is listed on the RCRA NonGen and San Mateo County BI databases. The RCRA NonGen database includes a 2018 listing indicating the business does not generate RCRA wastes. The San Mateo County BI database lists the facility in the Business Plan and Hazardous Waste Programs.

United Pacific #2201 and Apro LLC dba United Pacific 2201, 402 Delaware Street, is listed on the RCRA NonGen and San Mateo County BI databases. The RCRA NonGen database includes a 2019 listing indicating the business does not generate RCRA wastes. The San Mateo County BI database lists the facility in the Underground Tank, Business Plan, and Hazardous Waste Programs.

76 Mart, 402 Delaware Street, is listed on the San Mateo County BI database, which lists the facility in the Stormwater Program.

AT Auto Care, 402 S. Delaware Street, is listed on the RCRA NonGen database. The RCRA NonGen database includes a 2014 listing indicating the business does not generate RCRA wastes.

Robert Reed, 402 South Delaware Street, is listed on EDR's Historical Automotive database, which is based on a search of City Directories. The database lists gas stations under various names at the subject property address beginning in 1969.

There were no listings for any businesses at 524 East 4th Avenue.

SMCEH Records

SMCEH records concerning previous investigations and remediations associated with the Union 76 LUST case are discussed in Section 4.0. Other SMCEH records for the subject property primarily included inspection reports and summaries and permits. Noteworthy record information obtained in the SMCEH records included the following:

- January 2002: An SMCEH inspector noted that the auto repair facility had closed as of December 2000, and was expected to reopen in the summer of 2002;
- August 2002: Eight sumps failed testing. Sumps passed after repair and retesting;
- April 2003: An SMCEH inspector listed auto repair facility generation of approximately 60 to 70 gallons of waste oil per month, 55 gallons of waste antifreeze every 4 to 8 months, and 8 to 12 gallons of Safety Kleen solvent every 3 months;
- December 2004: An SMCEH inspector noted that a leaking roof was flooding the auto repair facility floor, creating the potential that oily wastes could enter the storm drain. Repair was requested;
- July 2005: A Notice of Violation (NOV) was issued for unlabeled drums. The SMCEH inspector noted that there was a new owner of the auto repair facility as of January 2005;
- July 2008: An SMCEH inspector listed auto repair facility generation of approximately 300 gallons of waste oil every two months, one drum of oil filters per year, 3 drums of antifreeze annually, and sump water disposed as needed. The inspector noted that the storage shed door should be labeled;
- June 2009: An SMCEH inspector noted that wastes generated by the auto repair facility included waste oil, waste antifreeze, and oil filters. No spills were noted;
- April 2011: An SMCEH inspector observed carburetor cleaner spilled inside the equipment storage shed. The spill was cleaned during the inspection (copy provided in Appendix H);
- April 2012: An SMCEH inspector noted that AT Auto Care was a new business at the site as of 2010 and had not yet prepared a Hazardous Material Business Plan (HMBP). The inspector reported that generated wastes included oil, oil filters, antifreeze, batteries, oily wastewater, and oil absorbent;
- April 2014: Violations observed at AT Auto Care included failure to dispose of hazardous wastes within 90 days, opened hazardous waste containers, and unlabeled drums;

- March 2015: SMCEH reported that secondary containment test failures from 2010 had not yet been addressed;
- November 2015: SMCEH inspected repairs made after secondary containment test failures;
- April 2016: Violations observed during an inspection at AT Auto Care included unlabeled waste and unavailable waste manifests;
- April 2018: Violations observed during an inspection at AT Auto Care included unlabeled waste and unavailable waste manifests;
- June 2018: AT Auto Care was in the process of closure activities. TNT Auto Repair started business June 25, 2018, and assumed responsibility for hazardous wastes left by AT Auto Care. The SMCEH inspector did not note any evidence of spills;
- June 2020: A SMCEH inspector noted that TNT Auto Repair had unlabeled and open waste containers; and
- Hazardous Material Inventories for the site list two 12,000-gallon gasoline USTs, a 550-gallon waste oil UST, 100 gallons of motor oil, 60 gallons of propane, 10 lead acid batteries, waste oil filters, and 55 gallons of waste antifreeze.

5.2.2 Surrounding Area

Several facilities listed on various environmental databases are in the area surrounding the subject property, as discussed below.

Dry Cleaners

As a result of the identification of PCE at the subject property (see Section 4.0), SMCEH requested that several existing and former dry cleaning facilities perform voluntary subsurface investigations, including Wardrobe Cleaners at 335 East 4th Avenue; Family Cleaners at 412 East 3rd Avenue; Quality Cleaners at 508 East 3rd Avenue; and A1 Cleaners at 174 East 4th Avenue. Quality Cleaners and Wardrobe Cleaners are the only facilities that performed site investigations. Family Cleaners reported that they were a drop off facility only and did not perform dry cleaning onsite.

Wardrobe Cleaners, 335 East 4th Avenue is located approximately 560 feet east-southeast and potentially up-gradient from the subject property and is listed on the LUST, EMI, SLIC, CERS, and San Mateo County Business Inventory databases. The LUST and SLIC databases list the facility as an open case. Wardrobe Cleaners has operated at this and/or an adjacent location since at least 1954. In 2016, in response to the SMCEH request discussed above, CSS Environmental Services (CSS) performed soil and groundwater sampling at Wardrobe Cleaners (CSS, 2016). The investigation included advancing two borings along

East 4th Avenue in the to approximately 30 feet bgs, collecting a soil sample from approximately 25 feet bgs and a grab groundwater sample from each boring. The collected samples were analyzed for the presence of VOCs and GRO. PCE was detected in the grab groundwater samples at 5 and 6.6 µg/L, and TCE was detected at 39 and 4.1 µg/L. PCE and TCE were detected at 69 and 19 micrograms per kilogram (µg/kg), respectively, in one of the soil samples. GRO was also detected in the soil samples at 7,300 and 2,000 µg/kg. CSS concluded that because the concentrations of PCE detected in groundwater near the Wardrobe Cleaners facility were lower than those detected at the downgradient Union 76 station, Wardrobe Cleaners was not the source of PCE. Additionally, CSS concluded that petroleum hydrocarbons detected in groundwater were from an upgradient source. CSS has prepared a workplan for additional investigations to be performed at the facility, including evaluating the vertical extent of VOCs in soil, collecting grab groundwater samples for analysis of VOCs, and performing a sub-slab soil vapor survey (CSS, 2019). The investigation was scheduled to be performed in early 2021, but there is no regulatory record of the investigation being performed.

Former Quality Cleaners, 508 East Third Avenue, located approximately 500 feet northwest of the subject property, performed a subsurface investigation at the former drycleaners site in March 2017 (Wheeler Group, 2017). The investigation included advancing three borings to a depth of approximately 20 feet bgs, collection of three to four soil samples from each boring for a total of 10 samples, and collection of a grab groundwater sample from one boring. PCE was detected in nine of the ten samples at concentrations ranging from 36.7 to 713 µg/kg. The highest concentration, which is above the RWQCB Tier 1 ESL of 420 µg/kg, was detected in a sample collected from approximately 1-foot bgs inside the former dry cleaning facility near the former dry cleaning unit (DCU). PCE and TCE were detected at 100 and 13 µg/L, respectively, in the grab groundwater sample; both concentrations are above their respective Tier 1 ESLs. Wheeler Group noted that because the elevated PCE concentration detected in groundwater was cross-gradient from the former DCU, an offsite source was present. SMCEH indicated that although the results of the investigation indicated a probable PCE release at the site, the results were inconclusive as to whether the former facility was the source of the contamination identified at the Unocal station (SMCEH, 2017). SMCEH recommended further investigation of the sewer lateral as a potential release point at the facility. No further investigations have been performed at the facility.

Kasbari Edman, 412 East Third Avenue, located approximately 500 feet northwest of the subject property, is listed on EDR's proprietary Historical Cleaners database. The address is the location of the current Family Cleaners, a drop off/pick up location. The building has reportedly been occupied by a cleaners since the 1970s. The listing is based on the business name in city directories, and not on known chemical use. SMCEH has no record of hazardous material use at the site. In an email dated June 21, 2017, Mr. Dino Antonazzi, son of the property owner since the 1950s, indicated that dry cleaning had never been performed on the property; cleaners in the building were only drop-off/pick-up locations. The email was a response to an SMCEH request for a voluntary subsurface investigation as a result of dry-cleaning solvent detected in groundwater in the site vicinity. SMBD records contain a

1994 permit application for installation of a "cleaning unit" at the facility, and a subsequent request from SMBD for information concerning chemical use in the "cleaning unit". SMBD records did not include a response to the request for the information, or any indication that the unit was actually installed.

As discussed in Section 4.0, PCE and associated VOCs have been identified in groundwater and soil gas at the subject property and in the site vicinity. A localized PCE plume is present in the site vicinity. Wardrobe Cleaners has been suggested as a potential source of the contaminants.

Service Stations

Union Oil, 500 East 4th Avenue, previously operated at the property immediately west of the subject property from approximately the 1950s to 1960s. No information was available concerning removal of the USTs from the facility, or any subsurface investigations.

Several other sites in the subject site vicinity are listed on hazardous materials release and storage databases. In general, these sites are not expected to present significant environmental conditions to the subject property based on one or more of the following: (1) the listed site has received case closure by the appropriate regulatory agency; (2) the listed site is either cross gradient or down gradient of the subject property with respect to the inferred regional groundwater flow direction; (3) the listed site is a soils-only affected case; and/or (4) the listed site is located at too great a distance to represent a significant environmental condition with respect to the subject property.

6.0 SITE INSPECTION

Inspection of the subject property was conducted by Ms. Kiersten Hoey of PES on September 1, 2021. The subject property is developed with a building containing a small retail store operated by Union 76, two service bays used by TNT Auto Repair, and a restroom. Site photographs are provided on Plates 3 through 9. PES's observations are summarized below.

Interior Observations

The building includes a small convenience store operated by Union 76, a restroom, storage area, and two service bays. One service bay contains an aboveground smog check dynamometer and lift, and the second service bay contains an aboveground hydraulic hoist and what appears to be an older, unused belowground hoist. Various auto repair tools and equipment, a waste oil receiver, Accu-turn tire changer and brake lathe, metal bin of oily rags, two 55-gallon drums of new motor oil (with no secondary containment), 1-quart containers of transmission fluid, 5-quart containers of motor oil, and 1-quart containers and aerosol cans of other various automobile fluids were observed in the area of the service bays. Staining was observed on the chipped concrete floor which appeared to be from oil drips and possible minor spills that occurred during auto repair activities.

Exterior Observations

In addition to the service building, the subject property consists of two 12,000-gallon gasoline USTs, one approximately 550-gallon waste oil UST, two canopies over five dispensers, asphalt-paved parking, and landscaped areas. Vehicle access to the site is provided by two driveways on East 4th Avenue and two on South Delaware Street. The exterior walls of the building appeared in fair condition. In addition to the USTs, hazardous material storage was observed on the southwest exterior side of the building, including four 55-gallon drums of used oil filters, waste anti-freeze, waste liquids (gasoline/water mixture), and waste solids (oily rags). The drums were not located on secondary containment and some staining was observed on the asphalt in the vicinity of the drums. An empty intermediate bulk container (IBC) tote was also located on the southwest exterior side of the building; the former contents are unknown.

Car detailing work is performed along the southeastern exterior wall of the subject building. An air compressor, a flammable cabinet with car detailing equipment and 1-gallon containers and aerosol cans of car detailing fluids are also located along the southeastern exterior wall. Staining was observed on the ground of the car detailing area as well.

Refuse and recycle rollaway bins, a green clothing donation bin, and rubbish including used chairs and automobile parts were observed in the southern portion of the subject property. Oil staining was observed on the ground throughout the subject property. Evidence of former soil borings were also observed throughout the subject property.

6.1 Undeveloped Area

There are no undeveloped areas on the site.

6.2 Chemical Use and Storage

As discussed above, two 55-gallon steel drums of motor oil (with no secondary containment) and 5-quart, 1-quart, and aerosol cans of automobile fluids are stored in the service station for use during smog checks and oil changes.

6.3 Underground and Aboveground Storage Tanks

Two 12,000-gallon gasoline and one approximately 550-gallon waste oil UST are located on the subject property. Other USTs were historically present at the site, as discussed in Section 4.0 above. No ASTs were observed during the site inspection.

6.4 Generators

No back-up generators were observed at the subject property.

6.5 Elevators

No elevators were observed at the subject property.

6.6 Hydraulic Equipment

An aboveground hydraulic hoist is located in one of the bays within the service building. Additionally, what appeared to be an old unused belowground hoist was located under the aboveground hydraulic hoist.

6.7 Indications of Polychlorinated Biphenyls (PCBs)

One pole-mounted transformer was observed above the East 4th Street sidewalk adjacent to the northwest side of the subject property. The transformer appeared in good condition and no staining or discoloration was observed in the vicinity of the transformer. It is unknown if the transformer contains PCBs.

Fluorescent light tubes were observed in use in ceiling light fixtures in the building. Based on the 1966 building construction date, the fluorescent light ballasts may contain PCBs.

6.8 Other Conditions

6.8.1 Asbestos

An assessment of asbestos-containing materials was not part of the scope of this ESA. The use of asbestos in manufacturing most construction materials was federally banned in 1981; however, use of stockpiled materials and import of such materials continued for many years thereafter. Based on the 1966 construction date of the subject property building, ACM may be present.

6.8.2 Radon

The National Radon Database includes radon information from U.S. EPA/State Residential Radon Surveys conducted between 1986 and 1992. The database includes test results from 2 sites within the zip code 94402. The average value for radon level reported in this region was 2.200 pico curies per liter (pCi/L) of air for the first floor living area. This is lower than the U.S. EPA's recommended action level of 4 pCi/L.

The survey indicates that it is unlikely that radon levels at the subject property are above the U.S. EPA action level. As such, radon gas testing is not deemed necessary for the subject property.

6.8.3 Solid Waste

Solid waste is placed in recycle and refuse rollaway bins located in the southern area of the subject property, supplied by Recology of San Mateo County. Various items including chairs, used tires, automobile bumpers, truck cap, 5-gallon air tank, and rubbish were observed in the dirt planter areas in the southern corner of the site near the rollaway bins.

6.8.4 Lead in Paint

The Consumer Products Safety Commission limited lead content in residential paint to 0.06 percent (600 parts per million) in 1978. Based on the 1966 construction date of the subject property building, lead-containing paint may be present.

6.8.5 Vapor Intrusion Evaluation

A regional PCE groundwater plume is known to exist in the site vicinity. The source of the VOCs has been identified as an upgradient source, likely Wardrobe Cleaners.

During the most recent groundwater sampling event (August 2017), benzene, ethylbenzene, and naphthalene were detected in groundwater at maximum concentrations of 620 mg/L, 7,200 mg/L, and 730 mg/L respectively, all in onsite well MW-6. These concentrations exceed the Groundwater Vapor Intrusion ESLs for residential and commercial use scenarios. From 2007 to 2014, groundwater monitoring included the analysis of all VOCs. During this period, the highest concentrations of PCE and TCE detected onsite were in well MW-7, located near the southern property boundary, and well MW-13B, a deep well located near the former UST excavation. In well MW-7, PCE and TCE were detected as high as 172 and 12.5 μg/L and in well MW-13B, PCE and TCE were detected as high as 460 and 42.6 μg/L, respectively, both in March 2010. The concentrations are above the Groundwater Vapor Intrusion ESLs for residential and commercial scenarios of 0.64 and 2.8 μg/L, respectively. Soil vapor samples collected from probes located near the former UST excavation in 2013 and 2014 and contained 19 $\mu g/m^3$ in one probe which is above the residential Vapor Intrusion ESL of 15 $\mu g/m^3$. There has been no indoor air quality sampling performed at the subject property.

Because the VOC concentrations previously detected in soil gas and groundwater may have decreased over the last decade, vapor intrusion concerns at the subject property may have lessened, but still are a potential concern.

7.0 SUMMARY AND CONCLUSIONS

The subject property consists of one legal parcel comprising approximately 0.45 acres bounded to the northeast by South Delaware Street, to the southeast and southwest by commercial buildings, and to the northwest by East 4th Avenue. The site has the addresses of 402 South Delaware Street and 524 East 4th Avenue, and is described by San Mateo County

APN 034-186-110. The site is currently developed with a Union 76 gasoline service station and TNT Auto Repair. The subject property is in an area developed with residential and commercial/retail buildings within the downtown area of San Mateo, San Mateo County, California.

Historical Site and Vicinity Use

By at least 1888, the site was occupied by residences and associated outbuildings. The site remained in residential use until at least the early 1960s. The currently-existing building was constructed in 1966 for use as a gas station. The site has remained in use as a gas station since that time. Operators of the gas station have included American Oil, Chevron, ConocoPhillips and Union 76. A portion of the building has been used as an auto repair facility, likely since construction of the building.

Based on the age of historical residences and structures at the site, it is likely that lead-containing paint was used and asbestos-containing materials were present. Lead may have been introduced into the soil via flaking and/or prior demolition activities. Asbestos may also be present in soil as a result of prior demolition activities.

The site vicinity was developed primarily with residences with several vacant lots by at least 1888. Commercial development began in the early 1900s. Businesses originally in the site vicinity included a PG&E substation, lumber/planning mill, and lumber yard. Beginning in the 1950s, several gas stations and dry cleaners were present in the site vicinity. A Union Oil gas station operated immediately west of the subject property until apparently replaced by the gas station on the subject property. Gas stations were present farther northwest, north, and northeast of the site. Dry cleaners present to the southwest and northwest included: (1) Wardrobe Cleaners at 333 and 335 East 4th Avenue; (2) Family Cleaners at 412 East 3rd Avenue; (3) R NU IT at 200 East 2nd Avenue; (4) San Mateo Cleaners at 507 South B Street; and (5) Blue Ribbon Cleaners at 306 East 5th Street.

Previous Investigations

Investigations were initiated at the subject property in 1992 following removal of two 12,000-gallon gasoline USTs and one approximately 520-gallon waste oil UST. The UST cavity was overexcavated, and approximately 800 cy was removed from the excavation and disposed offsite, and approximately 5,800 gallons of groundwater was pumped from the excavation. Environmental investigations included 20 soil borings advanced to depths up to 32 feet bgs, 26 groundwater monitoring wells installed in the two water-bearing zones identified at the site (subsequently identified as a single water-bearing zone), and three vapor probes monitoring points installed onsite and four installed offsite for the collection of soil, groundwater, and soil vapor samples.

The most recent groundwater sampling (2017) indicated the maximum estimated extent of GRO and benzene are approximately 350 feet and 245 feet, respectively, east of the former UST excavation, and GRO, benzene and naphthalene were detected as high as 42,000 μg/L, 620 μg/L, and 730 μg/L, respectively in well MW-6, located near the former UST excavation. MTBE was only detected in one well (MW-18) at 99 μg/L located near the east site boundary.

The highest VOC concentrations detected onsite were in well MW-7, located near the southern property boundary, and well MW-13B, a deep well located near the former UST excavation. In well MW-7, PCE and TCE were detected as high as 172 and 12.5 μg/L and in well MW-13B, PCE and TCE were detected as high as 460 and 42.6 μg/L, respectively, both in March 2010The concentrations are above the 2019 RWQCB Groundwater Vapor Intrusion ESLs for residential and commercial scenarios of 0.64 and 2.8 μg/L, respectively. Soil vapor samples collected from probes located near the former UST excavation in 2013 and 2014 contained a PCE concentration of 19 $\mu g/m^3$ in one probe, which is above the 2019 RWQCB Tier 1 ESL of 15 $\mu g/m^3$. The source of the VOCs has been identified as an upgradient source, likely Wardrobe Cleaners.

SMCEH issued case closure for the site under the LTCP in a letter dated November 4, 2019 (SMCEH, 2019b). SMCEH noted that hydrocarbon-affected soil and groundwater remain east and southeast of the fuel USTs and beneath South Delaware Street. In a letter to the City of San Mateo Community Development Department, SMCEH reported that the hydrocarbon-affected soil and groundwater remaining in place did not pose a significant threat to public health or the environment under existing land use. However, SMCEH is to be notified of any change in land use or planned removal of soil or groundwater from the area so the SMCEH could evaluate whether additional actions would be necessary to protect public health and the environment.

Regulatory Agency Records

Subject Property

The subject property is listed on the LUST, UST, RCRA NonGen, CERS, CERS Tanks, CERS Haz Waste, and San Mateo County BI databases. The LUST database lists the site as having received regulatory closure on November 4, 2019. The RCRA NonGen database includes a 2019 listing indicating the business does not generate RCRA wastes. The UST, CERS Tanks, CERS Haz Waste, and San Mateo County BI database listings correspond to current use of the site as a Union 76 gas station. The CERS database lists violations noted during SMCEH inspections performed at the Union 76 station, primarily related to UST testing failures which were subsequently corrected. There is no record of spills or releases noted at the site.

Hazardous Material Inventories for the site list two 12,000-gallon gasoline USTs, a 550-gallon waste oil UST, 100 gallons of motor oil, 60 gallons of propane, 10 lead acid batteries, waste oil filters, and 55 gallons of waste antifreeze.

Surrounding Properties

A regional VOC plume is known to exist in the subject property vicinity. Wardrobe Cleaners, located upgradient of the subject property, is believed to be the source.

Site Observations

The subject property is developed with a building containing a small retail store operated by Union 76, two service bays used by TNT Auto Repair, and a restroom.

Hazardous materials observed in the service building included two 55-gallon drums of new motor oil (with no secondary containment), 1-quart containers of transmission fluid, 5-quart containers of motor oil, and 1-quart containers and aerosol cans of other various automobile fluids were observed in the area of the service bays. Staining was observed on the chipped concrete floor which appeared to be from oil drips and possible minor spills that occurred during auto repair activities.

In addition to the service building, the subject property consists of two 12,000-gallon gasoline USTs, one approximately 550-gallon waste oil UST, two canopies over five dispensers, asphalt-paved parking, and landscaped areas. In addition to the USTs, hazardous material storage was observed on the southwest exterior side of the building, including four 55-gallon drums of used oil filters, waste anti-freeze, waste liquids (gasoline/water mixture), and waste solids (oily rags). The drums were not located on secondary containment and some staining was observed on the asphalt in the vicinity of the drums.

Car detailing work is performed along the southeastern exterior wall of the subject building. An air compressor, a flammable cabinet with car detailing equipment and 1-gallon containers and aerosol cans of car detailing fluids are also located along the southeastern exterior wall. Staining was observed on the ground of the car detailing area as well.

Refuse and recycle rollaway bins, a green clothing donation bin, and rubbish including used chairs and automobile parts were observed in the southern portion of the subject property. Oil staining was observed on the ground throughout the subject property. Evidence of former soil borings and wells were also observed throughout the subject property.

Based on the 1966 construction date of the subject property building, ACM and lead-based paint may be present, and fluorescent light fixture ballasts may contain PCBs.

Conclusions

PES has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ATSM Practice E 1527-13 of the property located at 402 South Delaware Street and 524 East 4th Avenue in San Mateo, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report.

The following three RECs were identified:

Historical USTs: Three USTs (two 12,000-gallon gasoline and one approximately 550-gallon waste oil) were removed from the subject property in 1992. SMCEH issued case closure for the site under the LTCP in a letter dated November 4, 2019. SMCEH noted that hydrocarbon-affected soil and groundwater remain east and southeast of the fuel USTs and beneath South Delaware Street. In a letter to the City of San Mateo Community Development Department, SMCEH reported that the hydrocarbon-affected soil and groundwater remaining in place did not pose a significant threat to public health or the environment under existing land use. However, SMCEH is to be notified of any change in land use or planned removal of soil or groundwater from the area so the SMCEH could evaluate whether additional actions would be necessary to protect public health and the environment. This constitutes a Controlled REC.

Potential Vapor Intrusion: A regional PCE groundwater plume is known to exist in the site vicinity. PCE, TCE, benzene, ethylbenzene, and naphthalene have been detected in groundwater beneath the site at levels above Groundwater Vapor Intrusion ESLs for residential and commercial scenarios. Additionally, a PCE concentration detected in soil vapor beneath the site exceeded the residential Vapor Intrusion ESL. Therefore, vapor intrusion to onsite buildings may be a concern. The source of PCE and TCE has not been identified but may be associated with offsite dry cleaner operations. This constitutes a REC.

Auto Repair Facilities: Staining was observed on the floor of the service bays, the ground in the vicinity of the 55-gallon drums of waste fluids, and on the ground throughout the site. These may have impacted site soil through cracks in the concrete and asphalt. No secondary containment was provided for drums. These housekeeping issues related to auto repair activities represent a REC.

PES also made the following noteworthy observations during the performance of this ESA:

- Based on the age of historical residences and structures at the site, it is likely that lead-containing paint was used and asbestos-containing materials were present. Lead may have been introduced into the soil via flaking and/or prior demolition activities. Asbestos may also be present in soil as a result of prior demolition activities;

- Based on the 1966 construction date of the subject property building, ACM and lead-based paint may be present; and

- Subsurface components of a former hydraulic lift may be present in the auto repair shop;

8.0 DATA GAPS STATEMENT

No significant data gaps that may have affected our ability to identify RECs associated with the subject property were identified during the performance of this Phase I ESA.

9.0 ADDITIONAL SERVICES

No additional services were provided during the preparation of this Phase I ESA.

10.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes of the Environmental Professionals signing this report are presented in Appendix I.

APPENDIX A

USER QUESTIONNAIRE AND PRELIMINARY TITLE REPORT

USER QUESTIONNAIRE[1]
PHASE I ENVIRONMENTAL SITE ASSESSMENT

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[2] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

User Information	
Name:	Austin O'Such
Title:	
Company:	WHRV
Representing, if applicable:	
Signature:	Date: 9-8-21

Site Information	
Site Name:	524 E 4th ave + 402 S Delaware San mateo
Address:	

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)

Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law?

N/A

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))

Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

N/A

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by

---

[1] In accordance with Appendix X3 of ASTM E1527-13.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

this type of business?

n/a

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

yes, 7.5 million.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property?

gas station + auto care

(b) Do you know of specific chemicals that are present or once present at the property?

likely gas + oil

(c) Do you know of spills or other chemical releases that have taken place at the property?

n/a

(d) Do you know of any environmental cleanups that have taken place at the property?

n/a

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of March 19, 2021 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Standard Owner Policy

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Linda B. Spady, Trustee of the Linda B. Spady Trust, dated December 25, 1986

The estate or interest in the land hereinafter described or referred to covered by this Report is:

Fee Simple

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2021-2022, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. A lease dated June 25, 1991, executed by Lucille G. Benedetti, Trustee of The Benedetti Marital Trust under agreement dated April 11, 1977 as lessor and Union Oil Company of California, dba Unocal, a California corporation as lessee, recorded March 10, 1992 as Instrument No. 92-032592 of Official Records.

   Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records are not shown herein.

4. The fact that the land lies within the boundaries of the Downtown Redevelopment Project Area, as disclosed by the document recorded June 22, 2007 as Instrument No. 2007-095410 of Official Records.

5. Water rights, claims or title to water, whether or not shown by the public records.

6. We find no outstanding voluntary liens of record affecting subject property. An inquiry should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any security interest in the subject property.

7. Rights of parties in possession.

INFORMATIONAL NOTES

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

1. Taxes for proration purposes only for the fiscal year 2020-2021.

First Installment:	$1,999.95, PAID
Second Installment:	$1,999.95, PAID
Tax Rate Area:	12-023
APN:	034-186-110

2. The property covered by this report is vacant land.

3. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

4. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

5. Should this report be used to facilitate your transaction, we must be provided with the following prior to the issuance of the policy:

   A. WITH RESPECT TO A CORPORATION:
      1. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
      2. A certificate copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
      3. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
      4. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
   B. WITH RESPECT TO A CALIFORNIA LIMITED PARTNERSHIP:
      1. A certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) to be recorded in the public records;
      2. A full copy of the partnership agreement and any amendments;
      3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
      4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
      5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
   C. WITH RESPECT TO A FOREIGN LIMITED PARTNERSHIP:
      1. A certified copy of the application for registration, foreign limited partnership (form LP-5) and any

amendments thereto (form LP-6) to be recorded in the public records;
2. A full copy of the partnership agreement and any amendment;
3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

D. WITH RESPECT TO A GENERAL PARTNERSHIP:
1. A certified copy of a statement of partnership authority pursuant to Section 16303 of the California Corporation Code (form GP-I), executed by at least two partners, and a certified copy of any amendments to such statement (form GP-7), to be recorded in the public records;
2. A full copy of the partnership agreement and any amendments;
3. Requirements which the Company may impose following its review of the above material required herein and other information which the Company may require.

E. WITH RESPECT TO A LIMITED LIABILITY COMPANY:
1. A copy of its operating agreement and any amendments thereto;
2. If it is a California limited liability company, a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) to be recorded in the public records;
3. If it is a foreign limited liability company, a certified copy of its application for registration (LLC-5) to be recorded in the public records;
4. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, such document or instrument must be executed in accordance with one of the following, as appropriate:
   (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such documents must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
   (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
5. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
6. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

F. WITH RESPECT TO A TRUST:
1. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
2. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
3. Other requirements which the Company may impose following its review of the material require herein and other information which the Company may require.

G. WITH RESPECT TO INDIVIDUALS:
1. A statement of information.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on

this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

LEGAL DESCRIPTION

Real property in the City of San Mateo, County of San Mateo, State of California, described as follows:

LOTS 2, 3 AND 4, AND A PORTION OF LOT 1, BLOCK 20, AS SHOWN ON THAT CERTAIN MAP ENTITLED "MAP OF THE TOWN OF SAN MATEO, SAN MATEO COUNTY, CALIFORNIA", FILED IN THE OFFICE OF THE RECORDER OF SAN MATEO COUNTY ON JANUARY 24, 1863 IN BOOK 2 OF MISCELLANEOUS RECORDS AT PAGE 95, AND A COPY ENTERED IN BOOK 1 OF MAPS AT PAGE 45, SAID PORTION OF LOT 1 MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE WESTERLY LINE OF DELAWARE STREET, FORMERLY "D" STREET, DISTANT THEREON 52 FEET NORTH FROM THE NORTHERLY LINE OF 5TH AVENUE; RUNNING THENCE NORTH ALONG SAID LINE OF DELAWARE STREET, 28 FEET; THENCE AT A RIGHT ANGLE WESTERLY AND PARALLEL WITH 5TH AVENUE, 110 FEET; THENCE AT RIGHT ANGLES SOUTHERLY AND PARALLEL WITH DELAWARE STREET, 28 FEET; THENCE AT RIGHT ANGLES EASTERLY AND PARALLEL WITH 5TH AVENUE, 110 FEET TO THE POINT OF BEGINNING.

EXCEPTING FROM LOT 4, THAT PORTION THEREOF CONVEYED TO THE CITY OF SAN MATEO BY DEED RECORDED MARCH 30, 1966 IN BOOK 5135 AT PAGE 314 OF OFFICIAL RECORDS.

APN: 034-186-110
JPN: 034-018-186-11A

NOTICE I

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

NOTICE II

As of January 1, 1991, if the transaction which is the subject of this report will be a sale, you as a party to the transaction, may have certain tax reporting and withholding obligations pursuant to the state law referred to below:

In accordance with Sections 18662 and 18668 of the Revenue and Taxation Code, a buyer may be required to withhold an amount equal to three and one-third percent of the sales price in the case of the disposition of California real property interest by either:

1. A seller who is an individual with a last known street address outside of California or when the disbursement instructions authorize the proceeds be sent to a financial intermediary of the seller, OR
2. A corporate seller which has no permanent place of business in California.

The buyer may become subject to penalty for failure to withhold an amount equal to the greater of 10 percent of the amount required to be withheld or five hundred dollars ($500).

However, notwithstanding any other provision included in the California statutes referenced above, no buyer will be required to withhold any amount or be subject to penalty for failure to withhold if:

1. The sales price of the California real property conveyed does not exceed one hundred thousand dollars ($100,000), OR
2. The seller executes a written certificate, under the penalty of perjury, certifying that the seller is a resident of California, or if a corporation, has a permanent place of business in California, OR
3. The seller, who is an individual, executes a written certificate, under the penalty of perjury, that the California real property being conveyed is the seller's principal residence (as defined in Section 1034 of the Internal Revenue Code).

The seller is subject to penalty for knowingly filing a fraudulent certificate for the purpose of avoiding the withholding requirement.

The California statutes referenced above include provisions which authorize the Franchise Tax Board to grant reduced withholding and waivers from withholding on a case-by-case basis.

The parties to this transaction should seek an attorney's, accountant's, or other tax specialist's opinion concerning the effect of this law on this transaction and should not act on any statements made or omitted by the escrow or closing officer.

The Seller May Request a Waiver by Contacting:
Franchise Tax Board
Withhold at Source Unit
P.O. Box 651
Sacramento, CA 95812-0651
(916) 845-4900

Privacy Policy

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its *Fair Information Values*, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's *Fair Information Values*. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   (a) building; (d) improvements on the Land;
   (b) zoning; (e) land division; and
   (c) land use; (f) environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   (c) that result in no loss to You; or
   (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   (b) in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

	Your Deductible Amount	**Our Maximum Dollar Limit of Liability**
Covered Risk 16:	1% of Policy Amount or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1% of Policy Amount or $2,500.00 (whichever is less)	$5,000.00

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   (a) and use
   (b) improvements on the land
   (c) and division
   (d) environmental protection
   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   (a) a notice of exercising the right appears in the public records on the Policy Date
   (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking
3. Title Risks:

(a) that are created, allowed, or agreed to by you
(b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
(c) that result in no loss to you
(d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks

4. Failure to pay value for your title.
5. Lack of a right:
   (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
   (b) in streets, alleys, or waterways that touch your land
   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an

accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   b.Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   a. a fraudulent conveyance or fraudulent transfer; or
   b. a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

EXECUTIVE SUMMARY

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 74 LUST sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 20 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 60 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 03/12/2021 has revealed that there are 3 Notify 65 sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 12 EDR Hist Auto sites within approximately 0.125 miles of the target property.

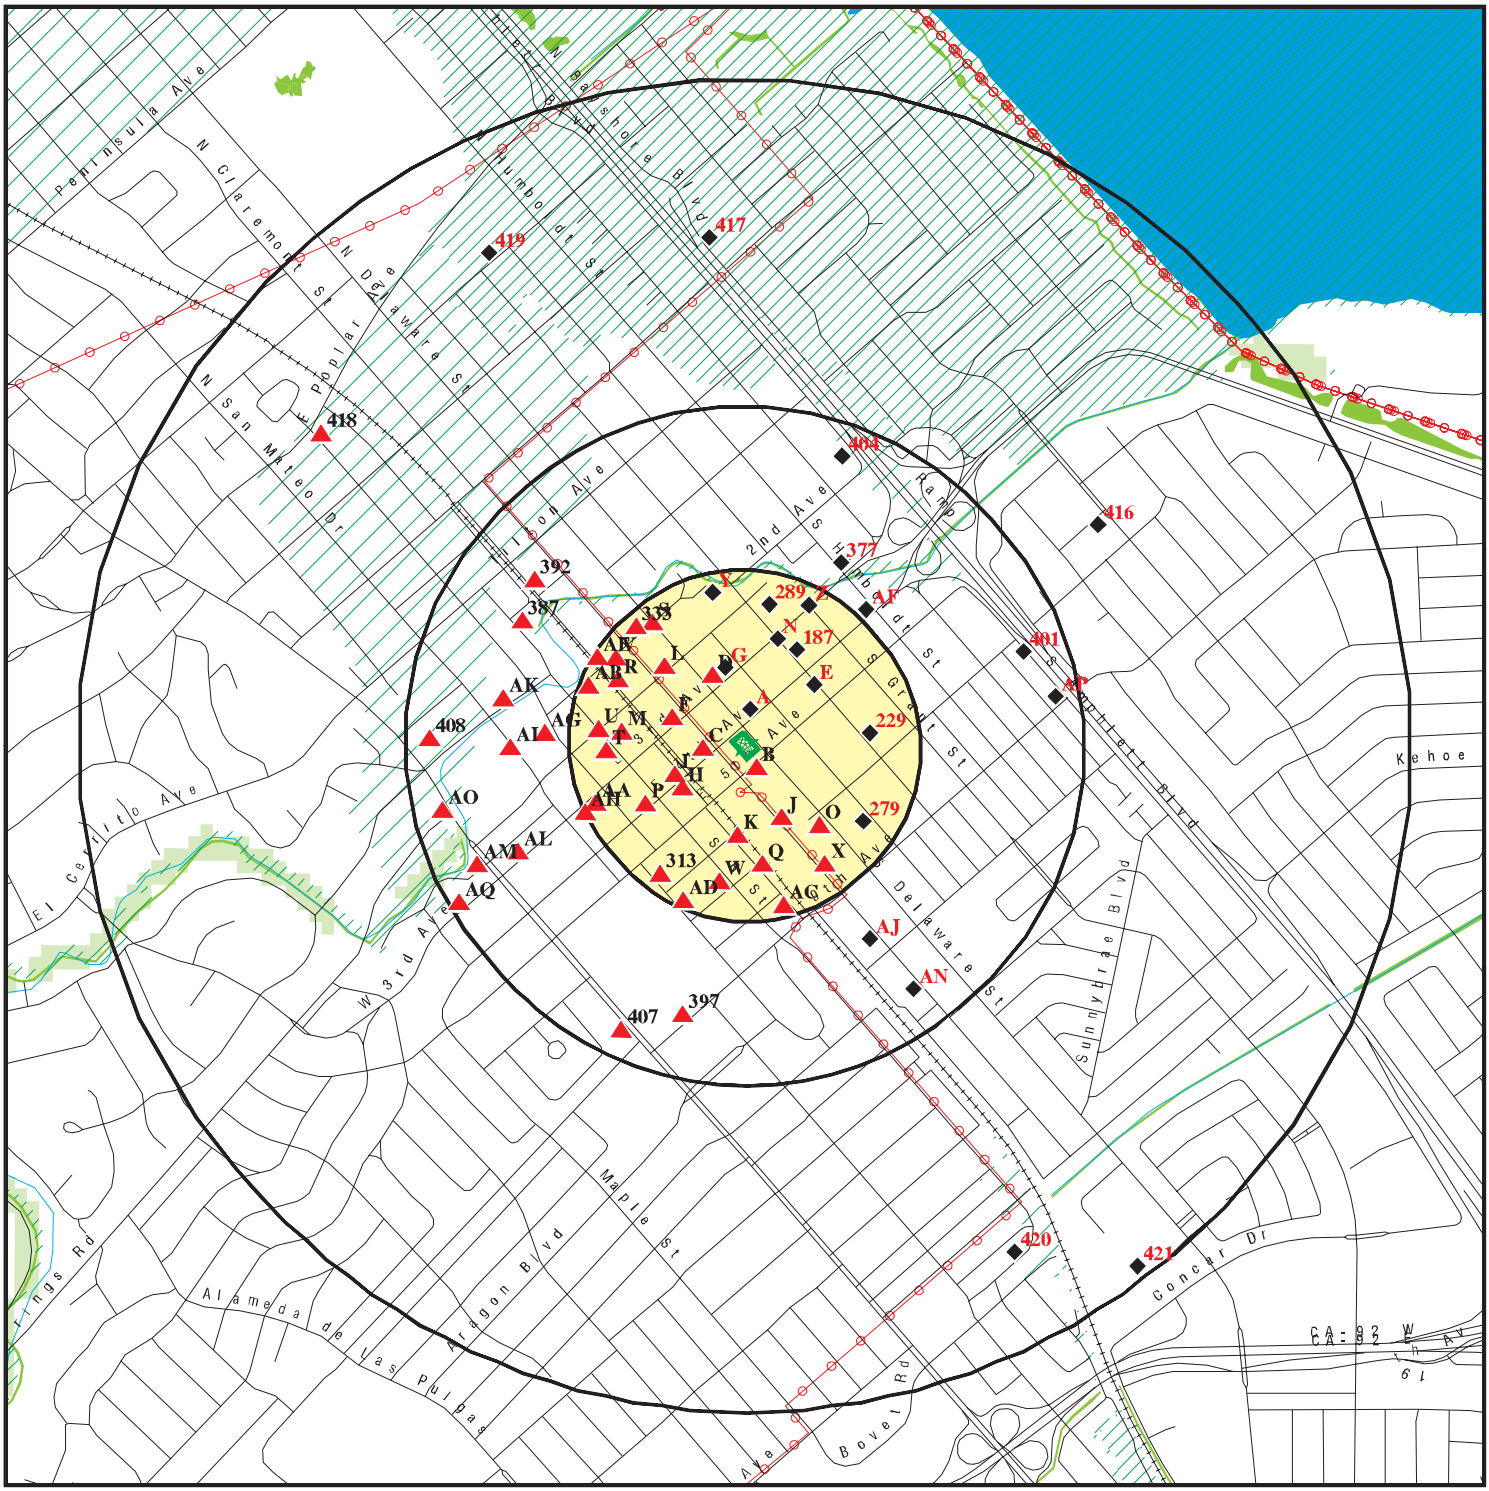
EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.



A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Violations:

Site ID:	520772
Site Name:	APRO Distribution 2201 Tad's 76
Violation Date:	03-25-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 08/27/2019. Premium and regular spill buckets are less that 5 gallons (1 liter less and 400 ml less respectively). Replace spill containers with 5 gallon containers. Apply for a permit to replace them. submit permit within 30 days. Complete replacement within 60 days. Note: Repair may require shortening the riser.

UNOCAL SERVICE STATION #6390 (Continued) **1000167419**

Site ID:	520772
Site Name:	APRO Distribution 2201 Tad's 76
Violation Date:	02-12-2020
Citation:	23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)
Violation Description:	Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).
Violation Notes:	Returned to compliance on 02/12/2020. One float and chain on dispenser 9/10 did not function on the first test. This was adjusted, re-tested and passed. Corrected on site.
Violation Division:	San Mateo County Environmental Health
Violation Program:	UST
Violation Source:	CERS

Site ID:	520772
Site Name:	APRO Distribution 2201 Tad's 76
Violation Date:	10-13-2018
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 08/27/2019. Facility information: Tank system was installed in 1992 according to tank forms. There is no secondary containment on vent, vapor recovery, or fill components. Based upon this installation, it appears as though either of the following 2 options would be required to meet the overfill protection installation requirements: 1. an audible visual plus ball float or 2. fill tube shut-off valve (flapper) No overfill device is installed with the used oil tank. If the facility meets the requirements for the exemption, please submit the forms to indicate that on the overfill section. No ball floats were observed or tested today. Please complete

UNOCAL SERVICE STATION #6390 (Continued) **1000167419**

	the the planned repairs and testing in order to comply with the overfill requirements. Note this testing was required to be completed by 10/13/18. Following testing in which the system passes, the next test will be due on or before 10/13/2021. Please schedule the 3-year test accordingly. Notify Env. Health 48 hours prior [Truncated]

Violation Date:	03-25-2019
Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 03/25/2019. Float and chain assemblies on UDC 1/2 and 5/6 failed on first test. They were adjusted and cleaned. On re-test, they passed. Corrected on site. This repair (5/6) took many attempts and approx. 90 minutes to complete. You may to consider installing stand-alone sensors if float-chain assemblies are resulting in repeated monitoring failures.

Eval Type:	Routine done by local agency
Eval Notes:	Previous CERS UST review comments: On review of the UST forms, the overfill protection portion shows that the facility is using an audible visual alarm. The overfill protection requirements indicate that the a UST installed after July 1, 1987 must also be using the flow restrictor (ball float) in conjunction with the audible visual alarm OR the facility must have secondary containment for the vent and tank risers. The facility is listing no secondary containment for the vent and tank risers. The facility could also use the shut-off valve (flapper) installed at 95% to meet this requirement. Secondary containment and corrosion protection is required on vent and tank riser piping for USTs installed after July 1, 1987 with this type of overfill prevention, because this type of overfill prevention does not meet the exemption criteria of section 2636 (a)(1) of the California Code of Regulations. For a chart and explanation from the waterboard, you can see their technical [Truncated]

Eval Notes:	Overfill equipment Inspection observed at 9:00 AM. Garrett Warren from CGRS conducted the inspection and testing (ICC and Veeder Root Certified) Facility inspection included removal of the probe to verify the level at which the audible and visual alarm activated. Upon inspection the audible alarm failed to function. The facility reported that the alarm was activated last week and was functioning properly. Upon further trouble shooting, the alarm returned to proper function. Please do the following things to verify that the alarm continues to function properly. 1. Until the potentially failing part is replaced, test the alarm using the test button each operating day. 2. Replace the potentially failing part (timer) as noted by the technician on the inspection report. The probe floats, set to go off at 108 inches or just under 90% of the tank volume appeared to function properly along with the audible visual alarm by the end of the inspection. Despite the verified [Truncated]

Violation Date: 07-02-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management,

JIFFY LUBE 1151 (Continued) **S121774597**

	and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 07/31/2019. Some training was recorded for 4/2018. Some additional hazardous waste training is conducted online. Records for each employee could not be generated today. Training is required to be documented annually. Submit complete training records including the date of training, employee names, employee job titles, and hazardous waste job descriptions for each job title. Submit evidence of completion to Env. Health within 30 days.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide systems or follow procedures to prevent overfills as described in the SPCC Plan, and/or failure to routinely test to ensure proper operation.
Violation Notes:	Returned to compliance on 09/10/2018. The overfill protection system for the middle used oil tank did not appear to function normally today. Submit evidence of correction that the alarm works or further explanation of how overfill is provided for these 3 tanks that are piped together. Submit that within 30 days to Env. Health.

Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes: Returned to compliance on 07/02/2019. Continue to maintain the daily inspection of tanks. Tanks were inspected through May. Corrected on site. Please provide evidence that daily inspection are being maintained.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 39795
Site Name: JIFFY LUBE 1151
Violation Date: 07-19-2018
Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail;. (b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., standby tank with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank).
Violation Notes: Returned to compliance on 09/18/2018. The waste antifreeze tank is continuously filled without a being equipped with a level sensing or overfill prevention device. Provide overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank). There may be an existing overfill alarm on the "dead" tank, however, please contact your tank company to choose the appropriate system for your tank. Submit evidence of correction to Env. Health within 30 days.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: OBSERVED: No HMBP training record was able to be provided for 2019-2021. 2018 record was observed. REQUIRED ACTION: Submit a copy of the completed training record for 2020-2021 to Env. Health by the comply by date.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 366625
Site Name: A M A TIRES & WHEELS
Violation Date: 09-12-2016
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 01/26/2017. Ensure facility employees have access to the HMBP on site. Print out and or provide employees access. Notify Env. Health that this has been completed.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 366625
Site Name: A M A TIRES & WHEELS
Violation Date: 09-14-2018
Citation: 40 CFR 1 265.171 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.171
Violation Description: Failure to accumulate hazardous waste in a container that is in good

A M A TIRES & WHEELS (Continued) **S121767907**

condition.

Violation Notes: Returned to compliance on 11/15/2018. The used oil drum is punctured with a hole, about dime sized, at the top of the container. These drums are required to be kept closed except when filling or draining. Corrective action: Replace this drum with a properly closed drum. The facility is currently storing an empty drum used for storing new oil. You could possibly replace your used oil drum with this drum. Submit evidence of correction to Env. Health within 30 days. Provide a picture or request an inspection from Env. Health.
Violation Division: San Mateo County Environmental Health

Violation Date: 09-14-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

A M A TIRES & WHEELS (Continued) **S121767907**

	greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 11/29/2018. No waste antifreeze manifest record could be located for the last year. No manifest record for hazardous waste paper oil filter pickup in the last year could be located. Corrective Action: Provide evidence that the hazardous waste antifreeze was picked up within the last year. If it has been longer than one year, have the waste picked up and properly manifested within 30 days. Provide evidence of correction to Env. Health within 30 days. If paper filters are intended to be separated from metal filters, the maximum accumulation time is 365 days when using point of generation or satellite accumulation rules (ex. Facility may have only 1 drum). If paper filters are to be routinely mixed with metal filters, all filters are consider hazardous waste.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BP OIL #11205 (Continued) **S103893910**

professional interpretations made in the referenced report. The site is an active Gas-N-Shop gasoline retail outlet located at the intersection of South Delaware Street and East Fourth Street in San Mateo, California. The site is located in a mixed commercial and residential area. Surrounding properties include ARCO, Unocal 76, Shell, Beacon and Chevron service stations within 300 feet. BP acquired the property from Mobil Oil Corporation in 1989. In August 1994, BP transferred the property to TOSCO Marketing Company (TOSCO), currently ConocoPhillips, and has not operated the facility since that time. There are currently three gasoline underground storage tanks (USTs) operating at the site. One 280-gallon waste oil UST was removed in September 1988. The dispensers were modified and product lines replaced in May 1991. Approximately 65 cubic yards of soil was excavated. Four onsite and three offsite groundwater monitoring wells have been installed at the site. MW-1 through MW-4 are onsite wells installed in 1992. MW-5 through MW-7 were installed offsite in 1993. All of these wells are completed to an approximate depth of 26 to 28 feet bgs. Groundwater monitoring has occurred at the site since the wells were installed. Since 1995, groundwater monitoring at the site has been coordinated with groundwater sampling activities conducted at ARCO Service Station No. 0515, located west of the site.

Violation Date:	01-25-2018
Citation:	HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description:	Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes:	Returned to compliance on 02/23/2018. Although a flapper was observed, the 87 tank was overfilled today at approx. 2:00 PM. It could not be confirmed why the overfill occurred with limited warning. Jack said he was near the panel when the alarm went off, however, the driver did and DO did not notice any change in flow or hear the warning. Approx. 5 gallons flowed onto the pavement. Additionally, overfill alarms were observed frequently in the alarm history. Consider installing an audible/visual annunciator system to avoid overfills like this in the future. Over pressurizing the tank could cause it to crack, resulting in a release to the environment. Provide evidence to Env. Health that there is sufficient administrative (training) and engineering controls (alarms/shut-off systems) in place to prevent overfills. Submit that within 30 days.

Citation:	23 CCR 16 2712(b)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(2)
Violation Description:	Failure to maintain monitoring records for release detection and/or maintain records of appropriate follow-up actions.
Violation Notes:	Returned to compliance on 06/17/2019. DO monthly reports indicate alarms and compliance issues, but do not clearly record how alarms or other compliance issues are properly followed up on. Submit the alarm record with an explanation of each follow-up action on the next monthly DO report. A work order associated with each alarm is also sufficient. Submit a copy of the properly completed DO report or alarm response records (work orders) to Env. Health within 30 days.

Eval Type:	Routine done by local agency
Eval Notes:	I spoke with the fuel delivery driver Jimmy Mellan who indicated that the overfill occurred suddenly and he expected that the tank could contain more fuel. No one observed a stick blocking the flapper and the driver indicated that he did not block open the fill tube shut-off equipment. No one on the site including the DO was able to notice a change in the rate of fueling or movement in the hose, like the flapper activating before they noticed fuel coming out of the fuel/vapor risers. I spoke with Jack Winner about these violations as well as the store manager.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency:	SAN MATEO COUNTY LOP
Lead Agency Case Number:	119190
Latitude:	37.5659835090303
Longitude:	-122.320383993883
Case Type:	Cleanup Program Site
Case Worker:	DGM
Local Agency:	SAN MATEO COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Lead
Site History:	10/23/15 - Data submitted to GPP staff in accordance with the requirements of the drilling permit reported elevated concentrations of lead in shallow soil. Low concentrations of contaminants were also reported in soil (gasoline) and groundwater (gasoline and PCE). However, it appears the gasoline components represent residual hydrocarbons from closed LUFT Case #110008 at 405 E. 4th Avenue (T. Endo Automotive). Refer to PES 12/14/15 report in local agency files for historical work.

ARCO #0515 (Continued) **S102424265**

Local Case Number: 110012
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Extracted from Stantec's February 17, 2010 Fourth Quarter 2009 Groundwater Monitoring Report, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The site is located at the southern corner of the intersection of South Delaware Street and Third Avenue in San Mateo, California in a mixed commercial/residential area. The site is currently an active retail fuel dispensing facility with a station building, two fuel dispenser islands, and three 10,000-gallon gasoline underground storage tanks (USTs). The site and vicinity currently have nine groundwater monitoring wells (MW-1A, MW-2 through MW-5, and MW-7 through MW-10), three groundwater monitoring wells from the adjacent former BP site (MW-1[BP], MW-2[BP] and MW-5[BP]), one groundwater extraction well (EW-1)., four vapor extraction wells (VEW-1 through VEW-4), and six air sparging wells (ASW-1 through ASW-6). On October 1, 1988, an Underground Storage Tank Unauthorized Release/Leak Contamination Site Report was filed with the San Mateo County Environmental Health Department by Tina Berry of Pacific Environmental Group, Inc. (PEG), as an agent of Atlantic Richfield Company. Groundwater benzene concentrations in MW-1 and MW-3, sampled on October 6, 1988, exceeded the SFB-RWQCB maximum limit of 0.7 "g/L. Five USTs, consisting of one 6,000-gallon and three 4,000-gallon steel gasoline tanks, and one 260-gallon steel waste-oil tank, were subsequently removed from the site between January 7 and 30, 1991. Approximately 1,315 cubic yards of soil were excavated from the UST complex, former and new waste oil tank excavations, and product line trenches, and transported offsite to a disposal facility. Following the discovery of separate phase hydrocarbons (SPH) in monitoring well MW-1A in October of 1991, a soil vapor extraction (SVE) and air-sparging (AS) pilot test was performed at the site on January 5 and 6, 1994. Based on the test results, a full-scale SVE system consisting of a skid mounted Airex KATOX 100C55 and a Sutorbilt 3HL (5HP) AS Blower was installed in 1996. Air sparging to enhance the hydrocarbon removal was not implemented because the pilot test found that air sparging did not increase hydrocarbon removal efficiency. The SVE system ran intermittently from August 1996 to July 30, 2001, using vapor extraction wells VEW-3 and VEW-4. Operation of the SVE system was halted in July 2001, due to the unit being out of compliance with Bay Area Air Quality Management District permit requirements. The total mass removed up to this time was 2,775.4 pounds of TPHg, as reported in SECOR's Third Quarter 2001 Quarterly Monitoring Report. On June 9, 1997, an Environmental Data Resources, Inc. (EDR) well survey report was requested to identify registered water wells located within a one mile radius of the site. Seven wells were located within a " to mile radius. Most of these wells are upgradient of the site, and one well was located within a to one mile radius cross-gradient of the site. Because the wells are up and cross-gradient from the site it is unlikely that they will be impacted by the dissolved hydrocarbon plume. On February 14, 2003, URS submitted a Case Closure Summary Report to the San Mateo County Health Department (SMCHD). On January 30, 2006, URS submitted a Work Plan for Shallow Soil Characterization to assess shallow soil conditions to support a case closure. In a letter dated June 26, 2006, the SMCHD approved the work plan with conditions and requested additional details. SECOR submitted an email

ARCO #0515 (Continued) **S102424265**

on August 21, 2006, detailing the installation of temporary vapor wells. In a letter dated November 7, 2007, SMCHD approved the scope of work detailed in the 2006 work plan and email. SECOR submitted a Well Destruction Work Plan and Monitoring and Sampling Reduction Request to SMCHD dated November 29, 2007. The work plan proposed destruction of wells MW-2, MW-5, MW-9, MW-10 and requested reductions in the frequency of monitoring and sampling for wells MW-1, MW-3, MW-4, MW-7, MW-8, and EW-1. Regulatory response to the work plan and request is pending. SECOR submitted a Shallow Soil and Soil Vapor Characterization Report dated March 6, 2008. Per recommendation of the characterization report, resampling of soil vapor wells SV-2 and SV-4 was completed on April 17, 2008. Results of the resampling were submitted in SECORs Shallow Soil and Soil Vapor Characterization Report Addendum and Site Conceptual Model dated May 30, 2008. In a letter dated July 29, 2008, the GPP recommended changes to the groundwater sampling program until additional data could be collected on the recent concentration increases in downgradient wells. Stantec prepared and submitted a Work Plan for Additional Site Assessment, dated November 12, 2008, per request by GPP in a letter dated July 29, 2008. In an email from the GPP, dated April 23, 2009, Stantec received a regulatory directive to reduce monitoring and sampling events at the site to a semi-annual basis, which are to be performed during the months of May and November. Additionally, wells MW-9 and MW-10 will be removed from the schedule. The semi-annual events will be coordinated with former BP Service Station No. 11205, located at 609 East 4th Avenue and the Shell station located at 611 East 3rd Street. On December 3, 2009, Stantec was onsite during excavation and replacement of fuel dispensers, underground dispenser containment (UDC) equipment, and fuel product lines. Facility upgrade activities were performed by Gettler Ryan, Inc. The completed scope of work at the site consisted of soil sampling from native soil beneath the former dispensers and product lines. Compliance soil samples were collected during the facility upgrade project under the direction of Mr. Dirk Jensen of the San Mateo County Environmental Health Division (SMCEHD). Based on the results of soil samples collected during facility upgrade activities, Stantec concluded there were no fuel impacts to shallow soil in the area of the fuel dispenser and product line compliance soil samples. Stantec recommended no further action related to the facility upgrade activities.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/23/2013.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 6542
Site Name: ARCO 00515
Violation Date: 02-16-2017
Citation: HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)
Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 04/14/2017. Failures: - The regular tank #2 boot was broken and could not be repaired during the inspection in order to complete the secondary containment testing. Repair and complete testing. - Sump for tank 1 failed. - Premium sump (tank 4) failed. Complete repairs and retest within 30 days.
Violation Division: San Mateo County Environmental Health

Violation Program: UST
Violation Source: CERS

Site ID: 6542
Site Name: ARCO 00515
Violation Date: 08-23-2019
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: Returned to compliance on 08/23/2019. Annular sensor on the used oil tank was stated to be placed at 36 inches on the overfill protection equipment survey from 8/24/18. This measurement did not appear to be correct. It was re-measured and the sensor was placed at 97 inches (dividing the circumference by 2 and adding the height of the riser). This was corrected on site.
Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 6542
Site Name: ARCO 00515
Violation Date: 10-19-2016
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 10/19/2016. Sensor L12 did not function on the first test .This sensor was replaced and retested. Test passed.
Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 6542
Site Name: ARCO 00515
Violation Date: 11-26-2013
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 12/23/2013.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 6542
Site Name: ARCO 00515
Violation Date: 08-20-2020
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 08/20/2020. OBSERVATION: 91 fill sump sensor failed upon initial testing. Sensor was replaced, re-tested, and passed. REQUIRED ACTION: None. This item was corrected on site.
Violation Division: San Mateo County Environmental Health
Violation Program: UST

Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Document upload accepted. Note: Based on the information provided (install date 1991, and no vent secondary containment) and overfill protection section (fill tube shut-off) it appears the facility is required to test the flapper shut-off valve. If the audible and visual alarm system is also included in your submission that is required to be tested as well, as part of the overfill protections system.

Eval Notes:	The facility is storing one 55 gallon drum waste antifreeze. One 550 gallon UST used oil. There is one 55 gallon drum of used oil filters outside. We discussed metal vs. paper oil filter waste management standards. One 30 gallon drum of waste gasoline filters/absorbent is on site. One 30 gallon drum of waste contaminated testing water is on site as well. Ensure the correct date is used on this drum. BP is managing the liquid waste and the gas station/shop is managing the waste solids.

Violation Date:	05-14-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 05/20/2019. Update the map to reflect the location of the following items: - storm and sewer drains - evacuation staging areas - Spill Kit materials (absorbent) next to hazardous waste. - Proper location of fire extinguishers and ESO for fuel - Location of hazardous waste storage (next to front entrances to building). Submit corrected map within 30 days to CERS.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	162627
Site Name:	Tommy's Chevron
Violation Date:	05-14-2019
Citation:	HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description:	Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes:	Returned to compliance on 05/14/2019. A small leak was observed on the copper tubing for the turbine pump in the 91 sump. This was repaired and cleaned up (less than 8 oz fluid) during the inspection. Reminder: Continue to prevent overfills of the tank. Some overfill alarms have occured recently (tank 1: 5/1/19, 2/24/19 and tank 2 12/31/18. Tank 3 (91): 4/26/19).
Violation Division:	San Mateo County Environmental Health
Violation Program:	UST
Violation Source:	CERS

Site ID:	162627
Site Name:	Tommy's Chevron
Violation Date:	05-08-2018
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure to maintain secondarily contained piping to allow liquid to flow into the sump in the event of a leak (i.e., failure to remove test boot).
Violation Notes:	Returned to compliance on 05/08/2018. Test boot valve was positioned

TOM'S VALERO (Continued) **S121748429**

facing upward. When the boots are in place the test valve must be placed in the downward position to allow a leak to be detected immediately. The valve was re-positioned into the downward direction during the inspection. Corrected on site.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 162627
Site Name: Tommy's Chevron
Violation Date: 05-08-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/08/2017. One 55 gallon drum of testing water is labeled as hazardous waste. The label has become illegible. This was corrected on site and dated 1/2017.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 162627
Site Name: Tommy's Chevron
Violation Date: 05-08-2017
Citation: 23 CCR 16 2631(g), 2632(c)(2)(A) & (B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2631(g), 2632(c)(2)(A) & (B)
Violation Description: Failure of the double-walled interstitial space of the tank to be continuously monitored with an audible and visual alarm.
Violation Notes: Returned to compliance on 05/08/2017. The annular space associated with tank 87-2 has rust/sludge. The sensor clip/float was no longer attached when pulled out of annular space. Jack Winner was able to replace it during the inspection and remove water collecting in the annular space. About a quart of water was removed. This issue also came up during the 989 testing in January. The origin of this water is not clear. Investigate further to determine the cause of this water intrusion into the secondary containment. Ensure that the sensor continues to function properly and damage to the tank will not cause a leak or failure. Provide documentation of further investigation or testing to Env. Health within 30 days.

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 04/18/2017. Facility piping was tested

TOM'S VALERO (Continued) **S121748429**

1/17/16 under pressure. Lines for tank 1 regular passed. Lines for tank 2 regular failed, exhibiting line leaks at dispenser 1 and 2. Lines for tank 3 Premium failed. The failure was exhibited at dispenser 5 and 6. Repair and rest lines within 120 days. Tank 2 interstitial space was not tight, or otherwise was found to be collecting water. This water was pumped out during the inspection by Mr. Winner. Pint and half of liquid came out. Upon inspection, the sensor was found to be missing the float. Interstitial space was tested and failed to hold a vacuum. Upon further review, vacuum throughout the system is connected and has to be completely blocked from the combined exit point and all 3 interstitial space openings in order to be tested properly according to the technicians. This test was in process by the end of the day and the result will be reviewed on the final report. Complete repairs and retest within 120 days.

Violation Source: CERS

Site ID: 162627
Site Name: Tommy's Chevron
Violation Date: 05-08-2017
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.

TOM'S VALERO (Continued) **S121748429**

	Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes:	Returned to compliance on 08/23/2017. The recent DO reports (since February) do not include the date of the secondary containment 3 year testing performed in January and April. Alarm history reports attached to the DO monthly inspections do not always provide sufficient alarm history to cover the entire period from the previous inspection date. If using the INFORM ALARM HISTORY REPORT instead of the tape from the Vedeer root, the date of the last inspection must be verified to ensure the alarm history covers covers the current date to the previous inspection date. Provide an explanation and documentation of corrections to Env. Health for each item above within 30 days.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 06/19/2019. Overfill devices were not tested today due to a replacement needed for 2 of the 3 spill buckets. Complete all permitted repairs and test overfill equipment as soon as possible. Submit permit and a plan to complete this testing within 30 days.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-19-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection report: Scope: This initial inspection was conducted virtually. Using the Facetime phone application and pictures taken of the site by the technician. Initial pictures were followed up by a tour of the site to verify the condition of the alarm panel, sumps, UDCs, spill containers, sensor placement, proper boot placement to allow any piping leaks to drain into the sump. Pictures placed in program file. The technician Rob Neimeyer was interviewed during the calls to verify the status of the equipment testing results, employee training, DO 30 day inspections, alarm history, work orders, corrections taken on site, and any plans to correct items. An update on the VMI cert was also provided. The following paperwork was requested. 1. A copy of the alarm history showing alarms for the last 12 months. 2. Designated Operators report for the months directly following a liquid sensor alarm. 3. Any work orders / records

Eval Notes:	Some condensation was removed from tank 2 annular which continues to be monitored. Based on the set up of the vent, by appearance, 3 tanks have individual vent lines and secondary containment has a manifolded vent line. If one line runs and then splits into 3 at the center tank, the center tank may be receiving the water condensation from this vent line. Rob has suggested that installing a desiccant filter on this vent line may help protect it from condensation build-up. I'll ask the specialist to determine if there are any concerns with this plan. Both spill buckets were tested for 5 gallon capacity and successfully held 5 gallons. Hydrostatic testing was conducted from 10:45-11:45. Both passed. Overfill equipment was also replaced today. A tank chart was generated by the contractor Robert Neimeyer. Based on a modern welding tank chart that was as close to the 10,071 gallon capacity of each tank as could be created. The flapper was originally set higher in the [Truncated]

Eval Notes:	No records of DO reports after April 20th, 2017 were observed in the compliance binder during today's re-inspection. The 989 reports for the most recent tests were not in the binder during today's

TOM'S VALERO (Continued) **S121748429**

inspection. Continue to file all UST work, repair orders, or related monitoring and maintenance paperwork in this binder for review during inspections. Secondary containment testing is documented for the spill buckets on 11/1/14 and 5/7/14, however the DO reports indicate a different date. Provide a document in the file that indicates this date is incorrect and provide a copy of the most recent DO reports with the corrected date. Provide an update on the secondary containment system testing with helium discussed on June 5th to verify that the middle tank annular is properly holding. No violations were able to be corrected during this re-inspection. Provide all corrective actions requested to be completed by 6/7/17 to Env. Health as soon as possible.

Eval Notes:	Technician: Rob Neimeyer Prior inspection report: The following equipment either failed or was not able to be tested on this date to failure of a component. -East tank piping: 87 Regular UST 10K (collar on secondary piping in sump is cracked) so piping cannot be tested. Repairs are anticipated to be made to this fiberglass component. This STP sump must also be tested following this repair. -Middle tank piping: 87 Regular UST 10K tank is manifolded to the regular tank and piping cannot be tested as noted above. - UDC for pumps 1-2, 5-6, and 11-12 failed to function upon testing. The Bravo packing nut was found to be leaking (bubbles observed via picture). These UDCs cannot be tested until tightened/repaired. - Supreme piping also cannot be re-tested until lines is tightened to UDC as mentioned above. 3/2/20 Sumps: East Tank, closest to store (87 Regular UST 10K) piping sump collar for testing sump and line repaired. After observing a few bubbles, the [Truncated]

Eval Notes:	Jack Winner stated that the annular space water was pumped out during the 989 testing and the vent piping was blocked to prevent water from entering. This will be reviewed during the upcoming AMC scheduled for May. The re-test was not yet completed at the time that the site visit ended, however, upon discussion with the technician later that day, it was reported that both lines passed testing. The report will be verified upon receipt.

Violations:
Site ID: 144753
Site Name: PRECISION TUNE AUTO CARE
Violation Date: 06-24-2019
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 07/18/2019. Train employees on the following items found to be out of compliance: - Keep oil filter drum closed. - Label or update hazardous waste label on each container. - Prevent overfills on the used oil tank.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 144753
Site Name: PRECISION TUNE AUTO CARE
Violation Date: 06-24-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 07/18/2019. The following containers are required to be kept closed when not actively being filled/emptied: - Used oil tank secondary containment is open and has less than 2 feet of freeboard. Do not collect used oil here if it cannot be closed. - The waste oil filters (metal and paper) drum lid appeared to be left open over night. Put the lid on and fasten the ring around the drum when not in use. Submit evidence of completion to Env. Health within 30 days.
Violation Division: San Mateo County Environmental Health

Violation Date: 06-24-2019
Citation: 40 CFR 1 265.201(b)(4) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(b)(4)
Violation Description: Failure to equip a continuously fed hazardous waste tank with a means to stop the inflow (e.g., waste feed cutoff system or by-pass system to a stand-by tank).
Violation Notes: Returned to compliance on 11/07/2019. Provide appropriate overfill protection for the used oil tank which is stored in a shed behind the shop. Currently the tank is remotely filled from inside the shop. Provide evidence that an alarm, cut-off system, or other appropriate overfill prevention method is in place for the tank.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 144753
Site Name: PRECISION TUNE AUTO CARE
Violation Date: 06-20-2017
Citation: 40 CFR 1 265.201(f) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(f)
Violation Description: Failure to remove all hazardous waste from tanks, discharge control equipment, and discharge confinement structures upon closure of the facility.
Violation Notes: Returned to compliance on 10/03/2017. The secondary containment around the used oil tank is filling with oil spill. Also debris is collecting in this area. Have the debris removed and the used oil removed from the secondary containment within 30 days. Provide evidence of correction to Env. Health within 30 days.

PRECISION TUNE AUTO CARE (Continued) **S113093319**

Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 08/16/2017. Metal used oil filters were found to be left on the ground outside. Put these into a drum immediately. When waste paper oil filters are generated, they must be managed as hazardous waste instead of using the metal oil filter waste management standards. If stored in the waste area outside, a drum of waste paper filters would be required to be collected every 180 days when small quantity generator status is maintained (generating less than approx. 270 gallons or 100 kg in each calendar month). When metal oil filters are generated they must be properly drained to prevent the oil from collecting in the drum. Crushing or puncturing is recommended to remove more oil from the filter in order to prevent oil from collecting in the drum. Provide evidence that the used oil filters are being properly collected and drained. Submit evidence of correction to Env. Health within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	144753
Site Name:	PRECISION TUNE AUTO CARE
Violation Date:	06-24-2019
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 07/18/2019. Small oil spills observed near the used oil tank. Residual staining observed around the used oil filter drums. Continue to clean up spills immediately to prevent them from infiltrating to the soil/groundwater. Submit evidence of completion to Env. Health within 30 days.

Violation Date:	06-24-2019
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being

PRECISION TUNE AUTO CARE (Continued) **S113093319**

refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: Returned to compliance on 07/19/2019. Several red steel drums and additional poly drums were found to be empty and collecting on site. Mark empty drums with the date emptied and remove within 1 year of the accumulation start date.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-20-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	During the inspection we discussed proper management of universal waste non-empty aerosol cans, however none were observed during the inspection. Used oil tank: Approximate use is 100 gallons of waste collected per month or 1200 gals per year. Used oil filters: Several drums of used oil filters were stored at the facility. Recently, drums were picked up that had been dumped at the site. The management of properly draining used oil filters and possibly separating recyclable metal filters from hazardous waste paper filters was discussed. Waste antifreeze is being managed as hazardous waste and is stored in a 55 gallon drum in an overpack drum.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 09-17-2019
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 09/17/2019. 2019: STP Diesel - Cleaned, re-tested and passed. Fill 91 Cleaned, re-tested and passed. 2018: L2 91 fill sensor did not appear to function on the first test. However, the sensor was moved around, and re-tested twice more. Each time it appeared to function normally. Corrected on site. To avoid possible violations in the future, consider replacing sensors that do not function properly upon first testing.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of

THIRD STREET SHELL #166 (Continued) **S121791570**

capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 10/23/2019. The overfill protection equipment testing is scheduled to be completed on October 2nd. No testing or report has been submitted to Env. Health. Submit evidence of completion to Env. Health within 30 days. Please Note: An NOV letter will be issued to the site requesting completion by December (as specified the letter). If the passing results are not provided to Env. Health by that date, the facility tanks will be red-tagged.

Eval Notes: The Q2 annual line test failed 8/26/18. A work order from 9/5/18 was available for review. It is not clear that this issue has been resolved. Each piing sump had what appeared to be condensation or less than an inch of water in the bottom of the sump. The diesel sump had liquid at 1-2 inches on one side, however, this did not set off the sensor. The technician reported he would clean out all of the liquid during the inspection.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-04-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: HMBP submitted 1/4/19. Please mark off the following item in the record keeping section of the employee training plan "Training Program(s) (i.e., written description of introductory and continuing training)". Training plan updated during the inspection. Facility processes refrigerant equipment at the 229 S RAILROAD AVE facility (R410a and R22). If storing over 200 cubic feet of any refrigerant at this facility, submission of a business plan for this facility is required. If materials are stored at the 207 S. Claremont facility (over 200 cubic feet) an update of the inventory would be required. There is a small metal cutting shop located in the 229 S. Railroad facility. If storing over 55 gallons of oil or coolant, this may also be reportable for the HMBP. If generating any waste associated with changing out oil from the equipment, the facility may be a hazardous waste generator. Any routinely generated hazardous waste by the facility or facilities will required [Truncated]

Eval Notes:	Received report from Wes regarding propane cylinders abandoned at

WHEEL WORKS #122149 (Continued) **S121749847**

Wheel Works and leaking. Contacted the manager and instructed him to call fire. Manager noted cylinders were punctured. Hazmat ER on scene to consult. Called manager to ask about surveillance and discuss recycling options for empty cylinders (left a voicemail). When he called back we discussed recycling when properly empty (valve stem removed). I tried to determine if any evidence could have been left behind, but no surveillance or tags identified yet. I asked Dermot to stop by if possible. County Specialty gas picked up the gases according to Dermot Casey.

Violations:

Site ID:	73132
Site Name:	T W AUTOMOTIVE LLC
Violation Date:	09-14-2018
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it

T W AUTOMOTIVE LLC (Continued) **S121791273**

has been emptied and shall be managed within one year of being emptied.

Violation Notes: Returned to compliance on 10/22/2018. Approximately 8x55 gallon metal drums were collecting on site. They formerly held motor oil but had been empty. They were not marked with the words "empty" and the empty date. Corrective Action: Mark containers (as noted above) and have them properly recycled, re-used, or picked up by your hazardous waste hauler within 30 days or within one year of the empty date. DTSC provides a fact sheet on empty container management, for reference.

Site ID: 73132
Site Name: T W AUTOMOTIVE LLC
Violation Date: 09-14-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 09/14/2016. Waste oil filters, used oil, and waste antifreeze drums closed during the inspection.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 73132
Site Name: T W AUTOMOTIVE LLC
Violation Date: 09-14-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 10/08/2018. Please add the 55 gallon drum of waste antifreeze, update used oil to 500 gallons, and consider putting the used oil filters (2 drums) in the HMBP inventory. Current inventory is has a slightly lower quantity for oil. Submit the updates within 30 days.
Violation Division: San Mateo County Environmental Health

Site ID: 73132
Site Name: T W AUTOMOTIVE LLC
Violation Date: 09-14-2016
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

T W AUTOMOTIVE LLC (Continued) **S121791273**

Violation Notes:	Returned to compliance on 09/14/2016. Emergency procedures form posted today.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	73132
Site Name:	T W AUTOMOTIVE LLC
Violation Date:	09-14-2018
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 10/16/2018. Waste paper oil filters have been collecting since 9/1/2016. The facility is required to have this hazardous waste picked either every 180 days (or 365 days maximum if only 1 55 gallon drum is collected at a point of generation in the shop). Submit a copy of the completed pickup record to Env. Health within 30 days.

	name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/19/2018. 4x55 gallon drums of used oil and one 55 gallon drum of waste antifreeze did not have a completed hazardous waste label or markings on the container. Ensure that all required wording is included on each container. Corrective Action: Update all container labels (listed above) and submit evidence of correction to Env. Health within 30 days. Provide a clear picture or request a re-inspection to close this violation.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	73132
Site Name:	T W AUTOMOTIVE LLC
Violation Date:	09-14-2018
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 10/16/2018. The drum of metal used oil filters was not properly closed during the inspection. There was also a small drum for collecting used oil filters (both kinds) which was open. Corrective Action: Properly close all containers (listed above) and submit evidence of correction to Env. Health within 30 days. Provide a clear picture or request a re-inspection to close this violation.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-11-2021
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	G Modified inspection procedure used. Met with Mark Victory on site. G Scope of the inspection: indoor shop. G Areas where waste is generated and located: Inside shop. G Facility operations: Repair of pumps and related systems. RECORDS: G EPA ID: Active - https://hwts.dtsc.ca.gov/facility/CAL000395643 G EVQ 2020 completed. G Training: Continue to conduct training on hazardous waste management with employees. G Manifests: No uniform HW manifest. Only consolidated manifests for used oil. G Non-RCRA waste: Used oil 5-35 gal/year, last picked up approx. 2017. Please send a copy of the record to Env. Health by 3/13/21. G RCRA Waste: None observed. G Waste determination may be required: G Coolant from machines may be hazardous waste when/if changed. Note this may also be reportable if it is 55 gallons. G Metal machining waste: Metal- shavings with sizes of 100- microns- or larger can be managed as- scrap metal- for recycling.- Metal shavings/dusts [Truncated]

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Modified inspection procedures used. Met with Mark Victory on site. HMBP Last submitted 8/22/20. Contacts / Activities accurate / comments: Emergency contacts verified. Training record / plan comments: No training record for the last year was able to be located today. Submit a completed training record to Env. Health by the comply by date. Contingency plan accurate / complete comments: No changes.

THE HAWKINS CO (Continued) **1006823593**

	Map accurate / complete: No changes. Inventory comments: Minor correction noted for the propane to liquid, gallons on the last plan check. Please resubmit plan to certify that correction. Recommend changing it to approx. 40 gallons due to the one 100 lbs propane and estimating 2x33pound forklift cylinders. That is a total of 1402 cubic feet or about 40 gallons. Propane storage indicates facility should likely be in program 2161 on the next evaluation.

Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 04/25/2019. The following wastes have not been picked up within the last year according to the accumulation start date on the container or the records provided: Waste antifreeze (approx. 100 gallons in tank). Dated approx. 6/2017 Waste paper oil filters dated 11/1/16 Waste waterborne paint dated 2/1/17 Waste thinner/paint not dated or illegible label. Schedule the pickup and provide evidence of completion to Env. Health within 30 days.

Citation:	HSC 6.5 25201.16(f) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.16(f)
Violation Description:	Failure to comply with the applicable requirements related to accumulation and containment standards for universal waste aerosol cans.

AKI AUTO SERVICE (Continued) **S121770133**

Violation Notes: Returned to compliance on 04/23/2019. Puncturing of cans is not acceptable unless the facility provides notification to Env. Health and complies with Health and Safety Code, section 25201.16(h), below. The facility may be able to use up the entire contents of the can, and when empty, dispose of in the regular trash. If the can cannot be safely emptied, manage it as universal waste or hazardous waste. (h) A universal waste handler may process a universal waste aerosol can to remove and collect the contents of the universal waste aerosol can, if the universal waste handler meets all of the following requirements: (1) The handler is not an offsite commercial processor of aerosol cans. For the purposes of this paragraph, a household hazardous waste collection facility, as defined in subdivision (f) of Section 25218.1, is not an offsite commercial processor. (2) The handler ensures that the universal waste aerosol can is processed in a manner and in equipment designed, maintained, and operated so as to [Truncated]

Site Name: KELLY MOORE PAINT CO
Violation Date: 10-31-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 11/18/2019. UNDETERMINED: The hazardous waste pickup from 9/5/19 was on site, however, no other hazardous waste records could be located today. REQUIRED ACTION: Provide a copy of all hazardous waste manifests from the last two years to Env. Health within 30 days.
Violation Division: San Mateo County Environmental Health

KELLY MOORE PAINT CO (Continued) **S121742016**

Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 11/22/2019. Mistint paint has been picked up from the site in quantities of 2,350 lbs. When over 55 gallons or 500 lbs of a hazardous material is stored on site, it must be added to the hazardous materials business plan. The waste tint containers were picked up recently in a quantity of 300 lbs. If this exceeds 500 lbs, add this item to the HMBP. REQUIRED ACTION: Submit update to HMBP within to 30 days.

Violation Date: 09-19-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/10/2019. Update each hazardous waste label with the physical state and hazardous properties. Labels requiring update: Used oil, waste antifreeze, waste paint booth filters. Bondo was corrected during the inspection for the physical state and hazardous property but does not have an accumulation start date. This is required on the label. Submit evidence of correction to Env. Health within 30 days.

Violation Date: 09-08-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 10/05/2017. Used oil and waste antifreeze

ALL CAR AUTO PAINTING & BODY REPAIR (SAN MATEO) (Continued) **S121758556**

	last picked up, 7/24/15. Have the used oil and/or antifreeze picked up from the site or respond with evidence that the facility has not collected waste beyond the acceptable accumulation time. Submit a response to Env. Health within 30 days.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/24/2015. Facility CER's #10622143 needs updating to show removal of all liquid hazardous materials/waste from facility
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	273785
Site Name:	All Car Auto Painting & Body Repair (San Mateo)
Violation Date:	09-08-2017
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 10/05/2017. Map posted. The emergency phone numbers posting could not be located. Post the emergency procedures form or equivalent and provide evidence of correction to Env. Health within 30 days.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

AUTO EUROPA BODY & PAINT SHOP (Continued) **1000325291**

corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Violation Date:	09-28-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 04/09/2019. The used oil filters (paper) is marked with a 2016 accumulation start date. Provide evidence that the used oil paper filters have been picked up in the last year. Submit

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Send a copy or evidence of correction to Env. Health by 4/5/19. We discussed how to correct the following: 1. Send a copy of the manifest for paper filters picked up in December (according to the label on the drum) to Env. Health. 2. A copy of the manifest was sent attempted to be copied, but the copy was too light to be legible. Send to: DTSC Generator Manifests Department of Toxic Substances Control P.O. Box 400 Sacramento, CA 95812-0400 3. The manifest correction letter was requested from Clearwater last Thursday, but they have not responded yet. It is the generator's responsibility to submit the manifest correction letter within a timely manner. Instructions: Manifest Correction Letters A manifest correction letter must be sent to DTSC whenever hazardous waste manifests submissions contain incorrect or incomplete information. Per California Health and Safety Code, section 25160.5, DTSC is authorized to charge a $20 manifest correction fee when [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

currently available, out towing a truck. I asked about the completed training records needed to close the violations and the staff member indicated they did not have the records but I could stop by later that day to talk to Alfredo.

Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 09-22-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Training records provided. Violation closed. Office staff provided the training record.
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 10-15-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Violation Discussed: 1. The feed trough secondary containment is collecting with oil. Have this pumped out into a properly closed container. The used oil drums are punctured and cannot be kept closed. Replace these drums with properly closing containers for used oil. This was observed to be corrected today. 2. The used oil drum labels were completely faded and illegible. The used oil filters (paper) label was missing the accumulation start date. This was corrected on site. A 5 gallon container with a funnel was found in the back to the shop. Provide a container for the waste paint solids (rags) for cleaning out paint cups. A label was provided today. Make a determination for the waste paint booth filters and take them to VSQG if the facility generates less than 27 gallons of hazardous waste or use a registered hazardous waste hauler if applicable. 3. Update the hazardous waste label on each of these containers and submit evidence of correction to Env. Health [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

PENINSULA PHOTOGRAPHICS (Continued) **1000685927**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	90895
Site Name:	All Car Auto Painting & Body Repair
Violation Date:	09-08-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 10/03/2017. The funnels for the waste lacquer based paint and waste waterborne paint drums were open. Ensure that these containers are properly closed unless actively filling or draining. Submit a picture of the closed container to Env. Health within 30 days.
Violation Division:	San Mateo County Environmental Health

ALL CAR AUTO PAINTING & BODY REPAIR (Continued) **S124446972**

Violation Date:	09-08-2017
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/03/2017. The waste paint was last picked up in 8/2016. Ensure that each container of hazardous waste is not accumulated for longer than 180 days unless using a special accumulation standard (Point of generation or 27 gallon rule). Provide a copy of the manifest of the completed pickup to Env. Health within 30 days.
