8. Implementation

This chapter provides a strategy for implementing the capital project recommendations in this Plan. This implementation strategy and sequence is guided by a criteria-based ranking consistent with the goals of this plan as well as the goals of other City plans including the General Plan and the Sustainable Initiatives Plan.

Phased implementation of the recommended projects and programs presented in Chapter 5 and Chapter 6 will take a significant amount of time, subject to a large number of variables. The most important of these variables include availability of funding for non-motorized transportation, City of San Mateo success in obtaining competitive grant funding, and local community and political support.

In the near-term, it is critically important to focus on a group of achievable, high priority projects. The high priority projects identified in **Table 8-8** of this chapter represent roughly \$12 million dollars in capital improvements and site-specific technical traffic studies to support near-term project refinement and development. These high priority projects are drawn directly from the results of the criteria-based ranking process presented in **Table 8-2** and supplemented with additional spot improvements and Downtown priorities.

These projects are intended for near-term implementation in the next one to five years. While this is a significant jump in expenditure for the City of San Mateo compared to the \$450,000 dollars the city has spent on bicycle facility improvements in recent years, current trends indicate that San Mateo is poised to make this jump. It is important to note the priority projects include the Hillsdale Overcrossing, estimated to cost \$10.7 million.⁸⁻¹ The city's commitment to implementing the goals of the Sustainable Initiatives Plan, to implementing transit oriented development, to continued investment in the Downtown; and commitment to the preparation of the Bicycle Master Plan, will certainly attract the wide variety of transportation funding and generate other financing required to complete this high priority project list.

8.1. Bikeway Project Ranking

The intent of ranking projects is to create a prioritized list of bicycle projects for implementation. As projects are implemented, lower ranked projects move up the list. The project list and individual projects outlined in this Plan are flexible concepts that serve as a guideline. The high-priority Tier 1 project list, and perhaps the overall system and segments themselves, may change over time as a result of changing bicycling patterns, land use patterns, implementation constraints and opportunities and the development of other transportation system facilities. The City of San Mateo should review the project list and project ranking at regular intervals to ensure it reflects the most current priorities, needs, and opportunities for implementing the bicycle network in a logical and efficient manner.

The plan's vision and goals inform the ranking criteria, which were developed with input from the City of San Mateo and the Bicycle Master Plan Steering Committee. These criteria are described in Table 8-1 and outlined below.

⁸⁻¹ Estimated cost in 2011 dollars when adjusted for 8.8% inflation (Bureau of Labor and Statistics).

Chapter 8 | Implementation

The criteria include:

- Safety
- Transit Connectivity
- Access to Community Destinations
- Access to Major Employers
- School Connections
- Network Connectivity

Based on the nature of the criterion, the projects were scored:

- Score / No Score
- Full Score / Half Score / Zero Score
- Scaled range from zero to ten

For example, projects evaluated for network connectivity will receive either a zero score or a full score. The project either extends the existing network/overcomes a freeway barrier or does not. By contrast, projects that connect to community destinations can receive a full, half or no score depending on whether it directly connects, indirectly connects or does not connect to a community destination.

All criteria have a maximum score of ten, giving each equal value or weight to each. The maximum potential score for each project is the sum of the maximum potential scores of all project criteria (60).

The Plan's vision and goals inform the ranking criteria, which were developed with input from the City of San Mateo and the Bicycle Master Plan Steering Committee. These criteria are described in Table 8-1. The overall score for a project is the sum of scores for individual criteria.

Criteria	Description	Maximum Score
Safety	This ranking is based on available 2003-2008 collision data identifying corridors with high incidents of bicycle related collisions within a quarter mile buffer of the proposed improvement.	10
	Projects are scored on a scaled ranking from zero to ten with locations with the most collisions receiving the maximum score.	
	Projects that directly connect to SamTrans or Caltrain Stations receive 10 points.	
Transit Connections	Projects located within a half mile of transit stations that connect to a bikeway directly connected to the station receive 5 points.	10
	Project that do not connect to transit receive zero points.	
	Projects that directly connect to community destinations including retail districts, libraries, community centers, and parks, receive 10 points.	
Community Center Connections	Projects located within a half mile of these destinations that connect to a bikeway directly connected to the destination receive 5 points	10
	Projects that do not connect to a community center receive zero points.	
	Projects that directly connect to any of the ten largest employers or the highest employment census blocks in the City receive 10 points.	
Employment Connections	Projects that connect to a bikeway that connects directly to one of these employers or areas of moderate employment density receive 5 points.	10
	Projects that do not connect to major employers, high or moderate employment density areas receive zero points.	
	Projects that directly connect to schools receive 10 points.	
School Connections	Projects that connect to a bikeway that directly connect to a school receive 5 points.	10
	Projects that do not connect to schools receive zero points.	
	Significant barriers to bicycle travel include crossings of US Highway 101, Highway 92, Caltrans, El Camino Real and the rail line.	
Network Connectivity	Projects that extend existing bikeways or that overcome these barriers receive 10 points.	10
	Projects that do not overcome these barriers or do not extend existing bikeways receive zero points.	
	Maximum Total Score	60

Table 8-1: Project Ranking Criteria

Projects were then placed into three phasing groups: Tier 1, Tier 2, and Tier 3.

- >30 points: Tier 1 projects have the highest potential for addressing the City's goals for bicycle transportation and are intended for near-term project implementation within one to five years.
- 20-30 points: Tier 2 projects are intended for development within 6 to 10 years.
- <20 points: Tier 3 projects are not currently ready for implementation but are included as long-term potential bicycle-specific projects over the next 11 to 20 years.

Table 8-2 lists the projects and their scores, organized into the three Tiers.

8.2. Project Cost Estimates

This section presents typical planning level unit costs for constructing bikeways in the San Francisco Bay Area in **Table 8-3** and **Table 8-4** lists summary cost estimates for each of the recommended bikeway projects. Unit costs presented here are planning-level cost estimates based on typical or average costs experienced by California cities and counties when constructing similar project. While these costs also reflect the urban nature of the City of San Mateo, they do not consider project-specific factors such as intensive grading, landscaping, intersection modifications, and right-of-way acquisition that may increase actual construction costs. For some segments project costs may be significantly greater.

Table 8-3: Es	stimated Bikewa	ay Unit Costs	5	
Item	Quantity	Units	Unit Cost	Total
Class III Bike Route - Urban - Per Mile	1			
Bike Route Sign/Wayfinding ¹	10	EA	\$ 300	\$ 3,000
Shared Lane Marking ²	20	EA	\$ 250	\$ 5,000
Total Cost Per Mile				\$ 8,000
Class II Bike Lanes	•			-
Bike Lane Sign/Wayfinding	10	EA	\$ 300	\$ 3,000
Striping Removal	10,560	LF	\$ 1.25	\$ 13,200
Striping and Stenciling	10,560	LF	\$ 2.50	\$ 26,400
Total Cost Per Mile				\$ 42,600
Class I Shared Use Path - 10' paved, 2' shoulders				
Wayfinding	4	EA	\$ 300	\$ 1,200
Clear and Grub	73,920	SF	\$ 1.00	\$ 73,920
Asphalt Concrete Pavement	52,800	SF	\$ 8.00	\$ 422,400
Decomposed Granite Shoulders	21,120	SF	\$ 5.00	\$ 105,600
Striping⁴	15,840	LF	\$ 2.50	\$ 39,600
Total Cost Per Mile				\$ 642,720
¹ Assumes five signs per mile in each direction.				

²Assumes shared lane marking are placed every 265 feet.

³Assumes two signs per mile in each direction.

⁴Includes center stripe and striping along path edges.

The construction of recommended facilities will also require additional field work to verify conditions. These include but are not limited to: roadway width, travel lanes, actual motor vehicle speeds, motor vehicle volumes, bicycle and motor vehicle travel patterns and conflicts, and pavement conditions. Final bikeway treatments should be selected based on verified conditions.

Table 8-4 summarizes the cost estimates for the recommended bicycle improvements organized into projectranking and tier. The cost estimate for the Hillsdale Overcrossing was developed during the HillsdaleOvercrossing Feasibility Study and adjusted for inflation.

8.3. Maintenance Cost Estimates

Bikeways require regular maintenance and repair. On-street bikeways are maintained as part of the normal roadway maintenance program and extra emphasis should be placed on keeping bike lanes and roadway shoulders clear of debris and keeping vegetation overgrowth from blocking visibility. The high cost of maintaining Class I facilities may be shared among various agencies or departments. The typical maintenance costs for the bikeway network are shown in Table 8-5.

Facility Type	Unit Cost	Description	Length (Miles)	Annual Cost	Notes
Class I	\$8,500	Miles/Year	3.71	\$31,500	Lighting and removal of debris and vegetation overgrowth
Class II	\$2,000	Miles/Year	3.03	\$6,100	Repainting lane stripes and stencils, sign replacement as needed
Class III	\$1,000	Miles/Year	22.17	\$22,200	Sign replacement as needed
Class III + SLM	\$1,250	Miles/Year	10.25	\$12,800	Sign and shared use stencil replacement as needed
			Annual Cost	\$72,500	

Table 8-5: Bikeway Maintenance Frequency and Cost Estimates

8.4. Bikeway Cost By Class and Tier

Table 8-6 presents a summary of bikeway miles and cost estimates by bikeway class. The total estimate for all the bikeway projects in this Plan is \$12.1 million. A significant amount of this cost estimate is due to the cost of the Class I bike paths and overcrossings. The recommended Class II, Class III, and Class III with SLM projects total \$277,400.

Table 8-6: Summ	Table 8-6: Summary of Costs and Miles by Bikeway Class							
Facility Type	Cost Estimate	Miles						
I	\$1,214,800	3.71						
II	\$129,000	3.03						
III	\$66,400	22.17						
III + SLM	\$82,000	10.25						
Crossing	\$10,700,000	0.48						
Total	\$12,092,200	39.64						

Table 8-7 presents a summary of bikeway projects by implementation tier.Tier 1, intended forimplementation in the next five years, is estimated to cost \$316,200.

Tier	Cost Estimate	Miles
1	\$316,200	12.42
2	\$10,882,300	13.99
3	\$993,700	13.24
Total	\$12,092,200	39.65

Table 8-7: Summary of Costs and Miles by Tiers

Table 8-8 at the end of this chapter outlines the high priority projects that include the Tier 1 bikeway infrastructure projects, as well as studies and priority programs.

8.5. High Priority Projects

This high priority project list can be implemented in the next one to five years. These high priority projects are drawn directly from the results of the criteria-based ranking process presented in **Table 8-2** and supplemented with additional spot improvements and Downtown priorities. As discussed above in section 8.1, this plan places an overall priority on implementing bikeways that provide direct access to transit, jobs, schools and that improve safety for all bicyclists in San Mateo. For this reason, all of the Tier I projects identified through the ranking process are included in this high priority projects list. In addition to these Tier 1 projects, many of the recommended spot improvements identified in Section 6.2 and the Downtown Bicycle Parking Plan were identified as high priority by the Bicycle Plan Steering Committee, community-at-large and numerous important stakeholders in the plan. Thus, these projects are recommended for near-term implementation in addition to the Tier 1 projects.

Table 8-8 below presents the high priority projects and costs. It should be noted the 31st and 28th Ave Class I facilities are part of the Hillsdale Station Area Plan, a transit-oriented development project, and will be eligible for funding from a number of sources. The Bay to Transit Path may also be eligible for funding from a number of sources to School and Safe Routes to Transit.

Location	From	То	Class	Cost
28th Ave	Mason Ln	El Camino Real	Ш	\$2,800
