San Mateo Main Library Art Gallery Dimensions & Hanging Guidelines

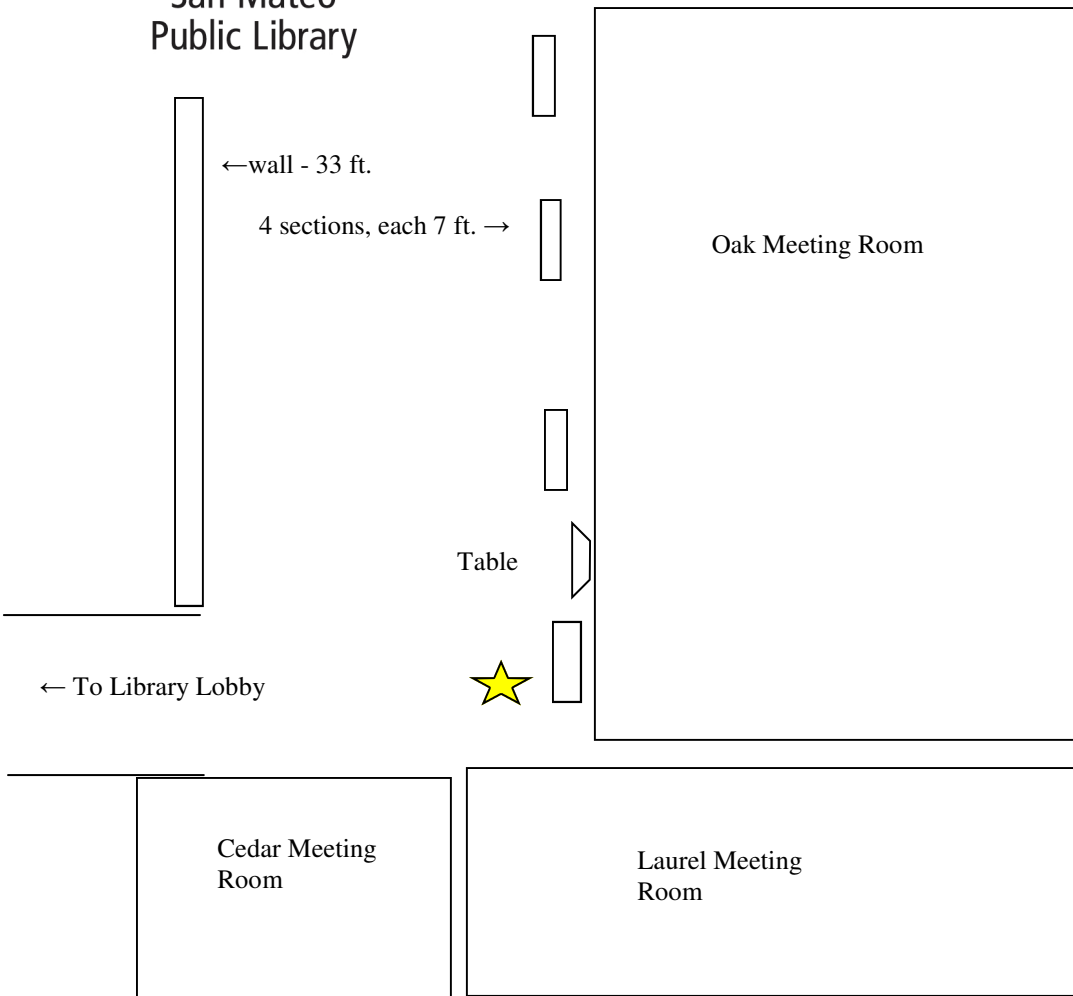

Photo of cable system and adjustable J-hooks.

All pictures must be framed and have wire to hang on hooks.

The hanging system consists of wall track system, from which galvanized steel cables with adjustable hooks are suspended. Each cable will support 35 lbs., heavier items will require two cables.

The library has a ladder you can use to hang your items.

Any labels or signs must be posted using “low tack” painter’s tape (usually blue) behind the items, any items posted with other materials will be removed.

A small table is available if you wish to leave business cards, a guest book, or price lists out for public viewing/use.

This wall section is visible to all customers entering the hallway for the art gallery/meeting room area. We recommend that you put a large, eye catching piece of art work here to pull people into the space to view your exhibit.
