**CALGREEN: RESIDENTIAL BUILDING PLAN SUBMITTAL CHECKLIST**

New residential buildings shall be designed to include the green building mandatory measures specified in this checklist. This checklist shall also be applied to additions or alterations of existing residential buildings where the addition or alteration increases the buildings conditioned area, volume, or size. The requirements shall apply only to the specific area of the addition or alteration.

* **LOCAL GREEN BUILDING AND ENERGY ORDINANCE MEASURES ARE LOCATED WITHIN THE CHECKLIST AND ARE IDENTIFIED WITH “SMMC” AND THE SAN MATEO MUNICIPAL CODE REFERENCE.**

</tbody>
</table>

Revised: 6/19/2020
Water conserving plumbing fittings. Fittings (faucets and showerheads) have all required standards listed on
plans and are in accordance to CGC 4.303.1.3 and CGC 403.1.4.

OUTDOOR WATER USE (CGC 4.304)

Scope. The provisions of Section 4.304 reference the mandatory Model Water Efficiency Landscape Ordinance
(MWELO) contained within Chapter 2.7, Division 2, Title 23 of the California Code of Regulations per CGC 4.304.1.

WATER REUSE SYSTEMS (CGC 4.305)

Laundry to Landscape Infrastructure. New single-family dwellings shall install a three-way diverter valve at the
drain line intended for optional laundry-to-landscape irrigation per CGC 4.305.1.

MATERIAL CONSERVATION AND RESOURCE EFFICIENCY

ENHANCED DURABILITY AND REDUCED MAINTENANCE (CGC 4.406)

Rodent Proofing. Annular spaces around pipes, electric cables, conduits or other openings in sole/bottom
plates at exterior walls shall be rodent proofed by closing such openings with cement mortar, concrete
masonry, or similar method acceptable to the enforcing agency per CGC 4.406.1.

CONSTRUCTION WASTE REDUCTION, DISPOSAL, AND RECYCLING (CGC 4.408)

Construction waste management. Recycle and/or salvage for reuse a minimum of 65% of the nonhazardous
construction and demolition waste per CGC 4.408.1

BUILDING MAINTENANCE AND OPERATION (CGC 4.410)

Operation and maintenance manual. An operation and maintenance manual will be provided to the building
occupant or owner per CGC 4.410.1.

Recycling by occupants. Where 5 or more multifamily dwelling units are constructed on a single site, provide
readily accessible collection areas that serve all buildings on the site for depositing, storage and collection of non-
hazardous recyclables (including paper, corrugated cardboard, glass, plastics, organic waste, and metals) per CGC
4.410.2.

ENVIRONMENTAL QUALITY

Fireplaces. Any gas fireplaces shall be a direct-vent sealed-combustible type.

Woodstoves. Any wood stove or pellet stove shall comply with US EPA New Source Performance Standards
emission limits per CGC 4.503.1.

POLLUTANT CONTROL (CGC 4.504)

Duct and mechanical systems protection. At the time of rough installation, during storage on the
construction site and until final startup of the heating, cooling and ventilating equipment, all duct and other
related air distribution components openings shall be covered with tape, plastic, sheet metals, or other methods
acceptable to the enforcing agency to reduce the amount of water, dust or debris, which may enter the system
per CGC 4.504.1.

Finish material pollutant control. Finish materials shall comply with Sections 4.504.2.1 through 4.504.5.1.

Adhesives, sealants and caulks. Adhesives, sealants and caulks used on the project shall meet the
requirements of the standards listed in CGC 4.504.2.1.

Paints and coatings. Paints and coatings shall comply with VOC limits per CGC 4.504.2.2.

Aerosol paints and coatings. Aerosol paints and coatings shall meet the Product-weighted MIR limits for ROC and
other requirements per CGC 4.504.2.3.

Verification. Documentation will be provided, at the request of the Building Division, to verify compliance
with VOC finish materials per CGC 4.504.2.4.

Carpet systems. All carpet installed in the building interior shall meet the testing and product requirement per
CGC 4.504.3. Carpet cushion and adhesive also must comply.

Resilient flooring systems. 80% of flooring must comply with one of the following: the VOC-emission limits
defined in the 2012 CHPS criteria and listed on its High-Performance Products Database; products certified under
UL Greenguard Gold program; certified under the Resilient Floor Covering Institute FloorScore program; or meet
California Department of Public Health 2010 Specifications per CGC 4.504.4.

Composite wood products. Hardwood plywood, particleboard and medium density fiberboard composite wood
products used on the interior and exterior of the building shall comply with the low formaldehyde emission
standards per CGC 4.504.5.

Documentation. Verification of compliance with this section shall be provided at the request of the enforcing
agency.
**INTERIOR MOISTURE CONTROL (4.505)**

Concrete slab foundations. A capillary break shall be installed if a slab on grade foundation system is used. The use of a 4” thick base of ½” or larger clean aggregate under a 6-mil vapor retarder with joint lapped not less than 6” will be provided per CGC 4.505.2 and CRC RS06.2.3.

Moisture content of building materials. Building materials with visible signs of water damage shall not be installed. Wall and floor framing shall not be enclosed when the framing members exceed 19% moisture content. Moisture content shall be checked prior to finish material being applied per CGC 4.505.3.

**INDOOR AIR QUALITY AND EXHAUST (4.506)**

Bathroom exhaust fans. ENERGY STAR compliant exhaust fans shall be provided in every bathroom per CGC 4.506.1. Fans shall be ducted to the outside and must be controlled by a humidity control, unless functioning as part of a whole house ventilation system.

**ENVIRONMENTAL COMFORT (CGC 4.507)**

Heating and air conditioning. Heating and air-conditioning system shall be sized, designed and have their equipment selected using the following methods:
2. Duct systems are sized according to ANSI/ACCA 1, Manual D-2014 or equivalent;
3. Select heating and cooling equipment in accordance with ANSI/ACCA 3, Manual S-2014 or equivalent.

**INSTALLER AND SPECIAL INSPECTOR QUALIFICATIONS**

**HVAC INSTALLER QUALIFICATION (CGC 702)**

HVAC installer training. HVAC system installers shall be trained and certified in the proper installation of HVAC systems and equipment by a recognized training or certification program per CGC 702.1.

**VERIFICATION (CGC 703)**

Compliance documentation. Upon request, verification of compliance with this code may include construction documents, plans, specifications, builder or installer certification, inspection reports, or other methods acceptable to the building department which will show substantial conformance.

---

**Responsible Designer’s Declaration Statement**

I hereby certify that this project has been designed to meet the requirements of the 2019 California Green Building Standards Code.
