COMMUNICATION PROGRAM
APPENDIX 11.3**

**Sewer Maintenance
Public Outreach**

Public Notice

Dear Property Owners/Residents:

The City of San Mateo Public Works Department strives to maintain the public sewer collection system in a manner which minimizes system blockages and resulting spills of sanitary sewage from manholes. If and when sewage spills do occur, we have an established overflow emergency response plan. The plan includes measures for containing and recovering spilled sewage, protecting the public and environment to the maximum extent possible, and public notification procedures if waterways are contaminated with sewage.

You have received this notice because your property is adjacent to a creek, drainage channel or to the Marina Lagoon. These waters could become contaminated in the event of a sanitary sewer overflow.

The City is updating its email distribution lists as an additional means of providing timely notification of contaminated water advisories. **If you would like to be on this e-mail list, removed from this list, or update your information, send an email to sparrish@cityofsanmateo.org or call (650) 522-7312.** Please provide the e-mail address you would like to use to receive notices as well as your address (a minimum of the street name you reside on).

Thank you for your cooperation
