

# NOTICE OF CONSTRUCTION

August 18, 2020

## PROJECT DESCRIPTION:

Construction is starting on the North Shoreview Flood Improvement Project.

Some of the work includes improvements to the Coyote Point and Poplar Avenue Pump Stations, and will prompt the temporary detour of the Bay Trail through the North Shoreview Neighborhood.

Construction will include sheet piling work that could be disruptive to residents closest to the Poplar Avenue Pump Station. We will make every effort to minimize the construction noise.

## PROJECT HISTORY:

Property owners in North Shoreview and North Central neighborhoods and within the FEMA Flood Zone approved an Assessment District in March 2018 to fund a portion of the improvements.

Property owners can expect the first improved assessment to show up on their property tax bills in FY 23-24.

# NOTICE OF CONSTRUCTION

An improvement project in your neighborhood will begin work soon. See the reverse of this card for details on your neighborhood's upcoming improvements.

The City of San Mateo Public Works Department ensures your infrastructure is efficient and sustainable for generations to come. Below are just some of the types of projects Public Works prioritizes:

## ROAD IMPROVEMENT

The maintenance and repair of our city's network of roads improves the quality of life for our residents and their visitors. These projects can be pavement reconstruction, slurry seal or roadway rebuilding.

## TRAFFIC FLOW IMPROVEMENT

Traffic flow is an essential element to safety in our communities. These projects can include dedicated turn lanes, intersection redesign, speed bumps installation or a new traffic signal.

## ACCESSIBILITY FOR ALL

The accessibility of our neighborhoods for all improves the health of our city for every citizen. These projects can include new or enhanced bike paths, sidewalks redesign, park trails and crosswalk improvements.

## STORMWATER MANAGEMENT

To decrease polluted stormwater flows into the San Francisco Bay, we work on flood zone improvements and Green Infrastructure design to ensure a healthy environment for all.
