

NOTICE OF WORK RETURN

April 20, 2021

The City of San Mateo will remobilize to Franklin Street and Fairfax Avenue beginning April 20, 2021.

UPDATED PROJECT DETAILS:

The reconstruction of the undisturbed portions of both Franklin Street and Fairfax Avenue will be completed using a modified construction method referred to as Full Depth Reclamation (FDR). Portions of roadway that have already been stabilized will be paved along with those segments that have been stabilized using FDR.

The FDR process involves cement treating the existing soils within the roadway section prior to overlaying asphalt, which will stabilize the soft soils and allow paving to continue. The FDR operation can be more disruptive and is typically reserved for use in areas with very soft subgrades. The current soil conditions warrant the switch to the FDR construction method.

In order to mix the soil and cement, all existing underground utilities must first be lowered to a safe depth below the mixing apparatus. California Water Service Company (CalWater) and Pacific Gas & Electric (PG&E) both responded promptly to the City's request to lower their utilities and have recently completed their work allowing the City to proceed.

The next sequence of work and approximate duration for the remaining portions of the project are as follows:

- Excavating and placing base rock subgrade stabilization **(4-5 days)**;
- Installing subsurface drains for the previously completed subgrade stabilization **(4-5 days)**;
- Pulverizing of base material, mixing with cement and water, and spreading along the roadway to form the cement treated soil base **(4-5 days)**;
- Curing of the cement treated base **(3 days)** **(During this period of time vehicles will not be allowed on the roadway, including accessing driveways)**;
- Finish grading and asphalt paving work of the total roadway width **(2-3 days)**;
- Asphalt pavement cure time **(7 days)**;
- Utility covers adjustment to grade and pavement striping **(2-3 days)**.

CONSTRUCTION HOURS:

The contractor will be posting/delivering construction information with specific dates and times regarding this project when on your street.

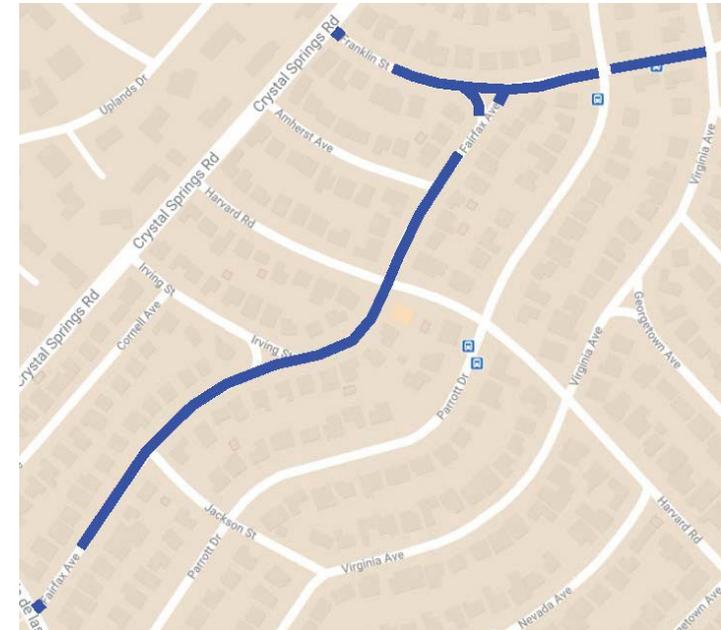

Typical Work hours will be Monday through Friday, 8 a.m. - 5 p.m., no work will occur on weekends unless warranted by special circumstances.

YOUR PARTICIPATION:

As the entire roadway will be reconstructed, temporary lane and/or complete street closures will be required. In addition, no street parking will be allowed during work hours, and the duration of the cement treated base cure period. Through traffic and driveway access will be maintained when possible, but there will be times when no access is allowed. We will issue doorhangers to affected residents, update our webpage (find link on the reverse), and post to NextDoor in advance of the days when no driveway access will be allowed. **If you have any special access needs during road reconstruction work, please contact us for accommodations.**

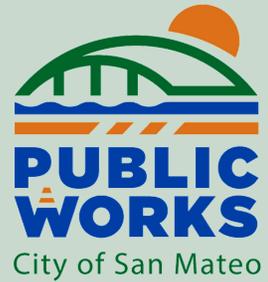

Please note the time, date, and location of the temporary "No Parking" on the street and plan to park accordingly. The temporary "No Parking" signs will contain the most current parking restriction information.

SEE REVERSE FOR IMPORTANT INSTRUCTIONS

HOW WILL THIS CONSTRUCTION AFFECT YOU?

There may be periods of time when lane and driveway access could be restricted. If you need to leave during the day or if you return home and the lane is closed, you will need to find parking for your vehicle away from the construction area.

- "No Parking" signs will be posted at least 48 hours in advance of the work. **If unexpected delays occur, the new date will be re-posted at least 48 hours in advance.**
- The City will coordinate with refuse companies, the post office, and other agencies to minimize any disruption of service during the construction. Your garbage and recycling will be picked up as usual. Please do not put other debris on the street when the construction is scheduled to take place.
- Reduced speed through the construction zone will be enforced for the safety of the public and the City's employees. The reduced speed will also prevent possible windshield damage due to flying rock fragments. Please keep in mind that traffic fines are doubled in construction zones.
- Please keep children away from the street during construction.
- Please do not run water onto the street the night before or during the construction, and for 24 hours after construction.
- Please remove all items that extend beyond the lip of the gutter to prevent impeding the construction work. These may include steel plate ramps that extend into the street from driveways as well as basketball courts in the street.

WARNING

Any vehicle parked within the temporary "No Parking" areas during the times posted will be towed at the owner's expense.

We are grateful for your patience and recognize the inconvenience of this important infrastructure improvement in your neighborhood. To complete the work and ensure its quality it is extremely important that the street is not used until it has had time to cure/dry properly. We will issue doorhangers to affected residents, update our webpage (find link below), and post to NextDoor in advance of the days when no driveway access will be allowed.

To avoid damage to your personal property and the street, **DO NOT DRIVE ON A STREET UNTIL ALL TRAFFIC CONTROL DEVICES HAVE BEEN REMOVED AND THE STREET IS OPEN FOR USE.** Follow all traffic control signs and **DO NOT move any barricades, cones, or delineators** in order to go around them.

It is **ILLEGAL** to move traffic control devices and traffic fines will be issued. If you are unsure whether or not you should drive on a street, or do not understand the detour signs, please call us to ask for assistance.
