

UPCOMING MAINTENANCE PROJECT

The City of San Mateo Public Works Department will be working near your home on the San Mateo Creek Freeboard Maintenance Project. The project will conduct minor repairs to the southern portion of the floodwall between J. Hart Clinton Dr. and Rand St.

What Work will be Performed?

Work includes clearing and grubbing vegetation along the creek wall, installation of temporary erosion control measures, and minor floodwall repairs. The minor wall repairs include filling any observed cracks in the wall to help ensure the wall's integrity.

What Should I Expect During Work?

Crews will be working along the creek behind residential properties on both sides of the floodwall. Work will consist of typical landscape maintenance type of work and noises while vegetation is removed to allow access to the wall. Wall repairs, if any, will be conducted using non-invasive techniques that are not considered noisy.

When Will the Work Be Performed?

Work is anticipated to begin mid-Spring 2022 and be complete by end of Summer 2022.

Who Do I Call if I Have Questions?

Please contact project manager Jana Cadiz at (650) 522-7575 or email jcadiz@cityofsanmateo.org.
